The Tuxedo—A New Design, Wonderfully Planned—SEE PRICE LIST

THE TUXEDO typifies the modern home, wonderfully planned to provide every convenience. The roomy central hall, so much in evidence in the latest designs, affords access to the spacious living room, and to the dining room, these rooms being "en suite" across the front of the house.

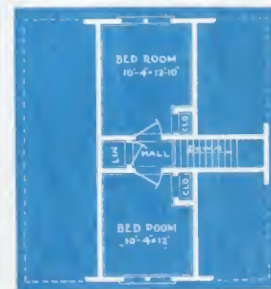

Imagine a kitchen $10\frac{1}{2} \times 16$ feet overall! And so handily laid-out! Lighted from two sides. A fine pantry (with outside window) may be arranged by ordering a door and frame to close off the rear right corner of the kitchen. The grade entrance, from the kitchen, is much appreciated. The coat room in the front hall and the linen closet in the rear hall provide ample space. There are three fine bedrooms. The stairway is one of the beauty features of this fine home.

For those requiring only one bedroom, we recommend leaving the upstairs unfinished for which a deduction will be quoted on request.

Unless otherwise requested, all Aladdin Homes are roofed with Clear Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

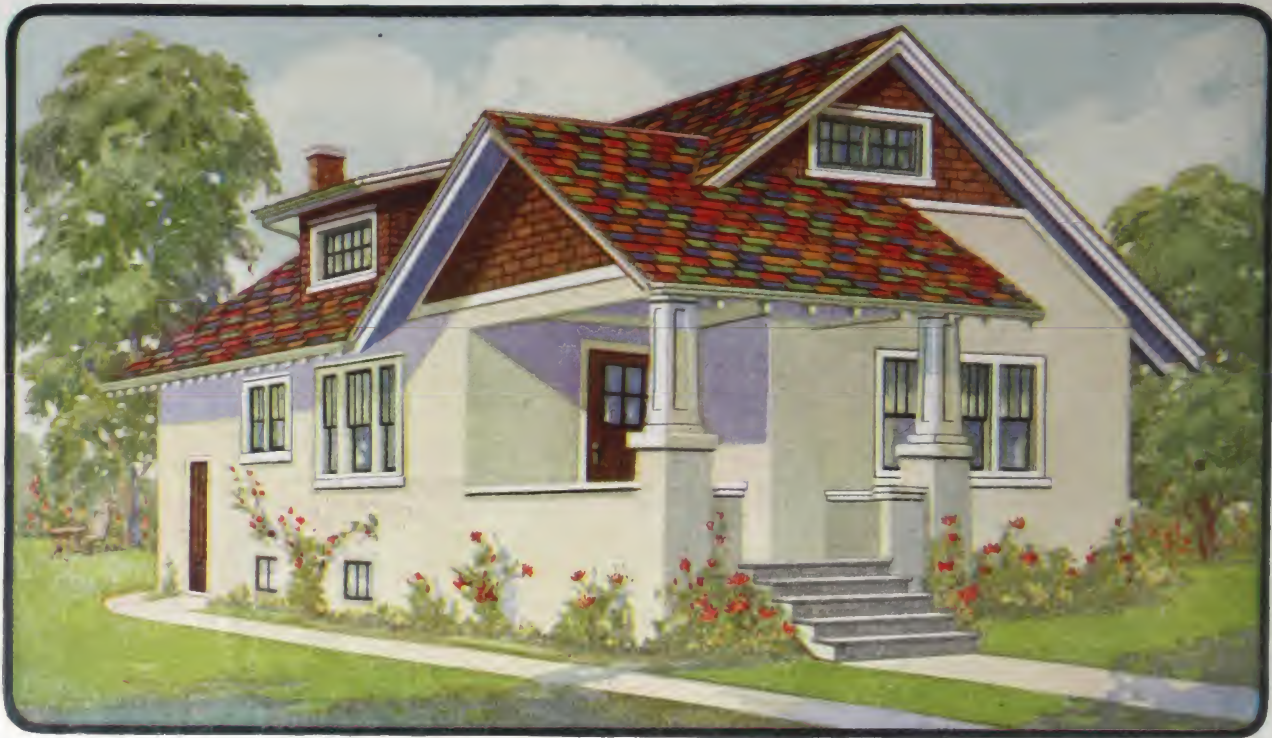

PLAN OF FIRST FLOOR

PLAN OF SECOND FLOOR

For full detailed Specifications, see Page 17.

A Prize Aladdin Home—See Price List

The Windsor

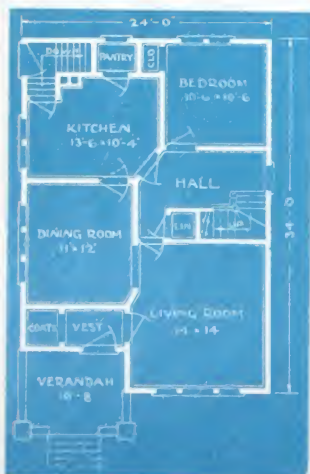

(Stucco or Frame)

HERE is a spacious bungalow, providing every convenience the heart can desire. Nothing has been overlooked. From the square verandah we pass through the vestibule, with its coat-room to the left, and step into the handsome living room, which is square. A fireplace may be built in the side wall, if desired.

A wide framed opening leads to the dining room, which, like the living room, has dignified double-mullioned windows. The kitchen is complete with pantry, and a grade entrance gives access to the garden and to the basement.

There is also a bedroom on the ground floor, a linen closet and large, square hall.

Upstairs are two delightful bedrooms, with closets, and a 6' x 8' bathroom.

PLAN OF FIRST FLOOR

TWO PANEL FIR DOORS

You will be interested in the illustration on page 19 of the Two Panel Fir Interior Doors which are supplied with all Aladdin Homes. The trim for doors and windows is clearly shown in the same illustration. Both doors and trim are identical in design and quality with that used in the best homes.

ALADDIN HEAVY INTER-WALL INSULATION

With all Aladdin Homes, Aladdin Heavy Inter-Wall Insulation is supplied to cover the sheathing of the outside walls before the siding or stucco is put on. This insulation keeps in the heat and keeps out the cold. Read page 19 about this extra heavy covering for your Home. Send for Free Sample.

If desired to have the bathroom downstairs, it can be arranged without additional cost by opening the main stairway from the living room and utilizing the outer portion of the downstairs hall as a bathroom, size 7' x 6'.

The exterior appearance is just as attractive and dignified as the interior is convenient and appealing to discriminating home lovers.

"There IS a lovely home!" so many have said.

The exterior walls are shown, finished in stucco. Variations may be had by using siding or shingles if desired.

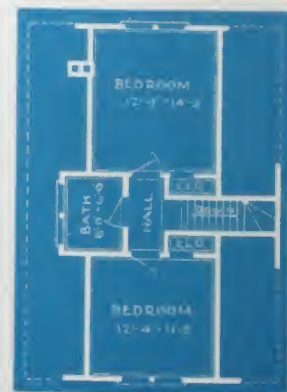

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir flooring, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

Unless otherwise requested, all Aladdin Homes are roofed with Clear Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

See Specifications on Page 17.

We will REVERSE the Plans of any Aladdin Home, without charge.

PLAN OF SECOND FLOOR

ALADDIN GUARANTEED MATERIALS

All the materials of an Aladdin Home are covered by a "Money-Back Guarantee".

This means that each piece of lumber is **subject to your Inspection**—Its quality is to be **inspected by you**.

You will understand what an obligation this places on the Aladdin Company and we have learned from practical experience that the closest inspection is, alone, not sufficient to ensure that not a single imperfect piece will get into the home.

We have adopted as a principle that we will purchase only materials that are "one-hundred percent number one".

The materials are inspected and "culled" when they are delivered in the mill yard. They are inspected by skilled workmen as they pass through planers, matchers and under the saws and they are given a final close inspection by an expert before they are loaded in your car.

Only after all these safeguards and inspections, are we satisfied that each individual piece is of **"the very best for its respective purpose"**.

PINE FRAMING STOCK

During 1927 there has been a falling off in the "grade" of Hemlock framing stock to the point that much of it will not come up to our rigid specifications.

This year we will largely use Pine instead of Hemlock.

This Pine is all "First Growth", a fine, clean, straight-grained, strong lumber, free from "checks" and all defects that would impair its strength.

With Pine and Selected Hemlock framing, you are assured that the **hidden, built-in materials** of your finished Home—the ones on which its **strength** and **permanence** depend—are of **the very best**.

WHITE PINE FRAMES AND EXTERIOR TRIM

In the past we have used some Spruce, some White Pine and some of other materials for outside trim columns, frames, etc. The Spruce and other substitutes used were of the best grade obtainable and superior to average White Pine, but still they were not quite up to our formula "The very best for the purpose".

In 1928 we will use **White Pine only** and are paying a bonus on the price to secure a grade that is **100 percent satisfactory**.

CLEAR SIDING, FLOORING ETC.

You are already familiar with the fact that we use **Clear Cedar shingles** for roofs, **Clear Cedar siding** for walls, **Clear Fir finish flooring**, and **Clear Fir doors**.

With the drastic improvement in our Framing and Finish materials we can truly say that the materials of our Aladdin Homes are in every particular "The very best for the purpose".

EVERY DETAIL IS CAREFULLY WATCHED IN AN ALADDIN HOME

Have you given thought to the hundreds of small but important details that must be covered in the specifications of a high class home. A few of these are noted below:—

The **lock sets for bathroom doors** of all Aladdin Homes have a **nickel plated** knob and plate on the bathroom side and are fitted with a thumb latch, doing away with a key.

Special hardware is supplied for the exterior of the front and rear doors which will not corrode or deteriorate under the most severe weather conditions.

The glass of Aladdin Homes is Libby-Owen's **Flat Drawn Sheet Glass**. You probably know that most window glass is first blown in cylindrical shape and then flattened out to form a sheet. This process produces irregular thicknesses, wavy glass and other defects. Libby-Owen's glass is manufactured in sheet form and is immensely superior to blown glass.

These features are only a few of the hundreds on which your interests are carefully guarded. You will appreciate that building hundreds of houses yearly as we do, every item, even the smallest is most carefully considered and planned so that, guided by our determination to make Aladdin Homes the **"last word" in perfection of materials and construction**, it is not surprising that they have been brought to the high place in public esteem that they now occupy.

"A Wonder Home" they all say—See Price List

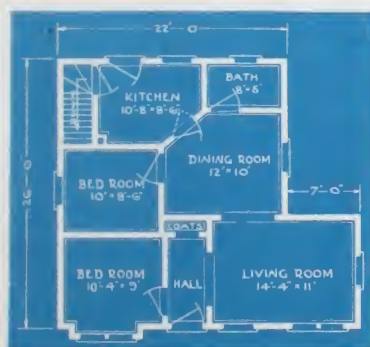

The Lorraine

THE LORRAINE. The greatest value for the money from any view point—whether considered from the angle of available floor space, attractive appearance or roomy convenience of interior arrangement.

The designer has accomplished the ideal in the Lorraine. The wide sweep of front gives an effect of imposing roominess seldom found in a home costing so little. The centre entrance front door gives access to a front hall, with ample coat room. A framed archway on the right leads to a large living room 14 x 11 feet in size. Such a large room is seldom found in homes of this size, it provides plenty of room for the largest furniture.

Each of the alternative floor plans has two excellent bedrooms, a bathroom and kitchen. Note the size of the kitchen, practically 12 feet square, in Plan B, and the convenient rear entrance at grade level which also affords access to the basement. Everyone studying this plan remarks on its ideal arrangement and large rooms which utilize so effectively every inch of space. The clothes closets provided for each bedroom will gladden the heart of the tidy housewife.

In Plan A a dining room is also provided, which is connected by a wide archway with the spacious living room. If the bathroom is not required it will be made into a pantry, opening from the kitchen.

FLOOR PLAN A

Unless otherwise requested all Aladdin Homes are roofed with Clear Cedar shingles. If "Four Color" shingles are wanted, they will be furnished at a small added cost which will be quoted on request.

We are delighted to show this "Wonder Home" because it is just what so many have been looking for. We can promise you will be more than pleased with the Lorraine.

PLEASE DO NOT ASK US TO ARRANGE UPSTAIRS ROOMS IN THE LORRAINE. THE HEADROOM THERE IS NOT SUFFICIENT TO PERMIT IT. THE LORRAINE IS A TRUE BUNGALOW WITH EVERYTHING HANDILY ARRANGED ON ONE FLOOR.

FLOOR PLAN B

A Real Beauty—Five Plans to choose from—See Price List

The Cedars

THE CEDARS is a beautiful bungalow, marvellously low priced and remarkably designed. Five fine plans are shown below, while the photograph above illustrates the charm and home-appeal of the exterior. Wonderful in its convenience of layout, as in its very low cost and, at the same time, handsome in appearance. A home you will be proud to own. The verandah, size 16 x 8 feet, shown in picture may be ordered with the house (see Price List) or added later, when desired. If preferred, verandah columns extending down to the verandah floor will be supplied without additional cost. From the five floor plan arrangements you are sure to find one that exactly meets your ideas of a comfortable, convenient, sturdy home.

If desired, Plans G and D can readily be arranged with only two bedrooms, each larger and each with a clothes closet.

For full detailed specifications, see page 17.

If preferred, Siding will be provided instead of Shingles for the outside walls, without extra cost.

THE CEDARS—PLAN E
This floor plan arrangement is a highly popular one. Think of such a complete home—containing living room, dining room, kitchen, two bedrooms, bath, and inside cellar entrance for such an astonishingly small price! If a bathroom is not required, this room makes a fine pantry, with the door changed to open from the kitchen.

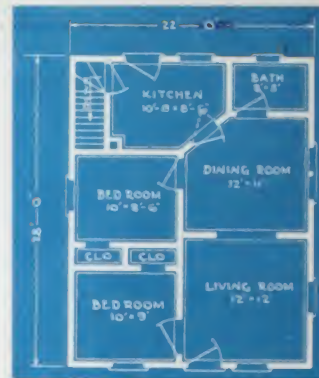

THE CEDARS—PLAN F
Plan F provides a vestibule inside the front door, also a grade entrance and basement stairs at the rear door. Two good bedrooms, each with closet, a bathroom and large kitchen and living room offer every comfort.

THE CEDARS "28"

To provide clothes closets, for each bedroom, the Cedars "28" is made two feet longer than the standard Cedars, that is 28 x 22 feet in size. This also affords a large living room and dining room, these being 12 x 12 feet and 12 x 11 feet respectively. The space occupied by the bathroom, if not required for that purpose, is just right for a pantry.

We will REVERSE the Plans of any Aladdin Home, without charge.

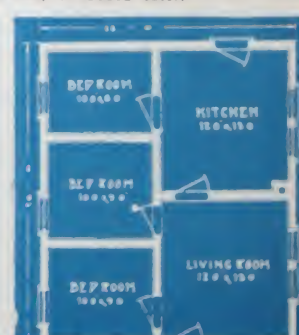

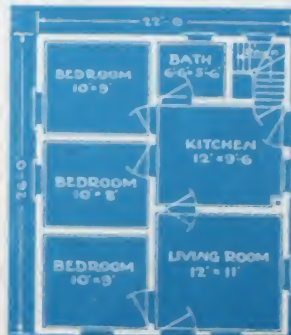

THE CEDARS—PLAN D (below)

The Cedars, Plan D, is produced as the result of a demand for three bedrooms, with big living room, and big kitchen. It also has double windows in the two latter rooms. As mentioned, the Verandah shown in picture below may be built with the house, or added later.

THE CEDARS—PLAN G

Here is a plan for a family of six. Three bedrooms, living room, kitchen, bathroom and basement stairs. A cosy convenient little home of which you will have reason to be justly proud. Verandah, size 16 x 8 feet, will be furnished like shown in picture, as quoted in Price List.

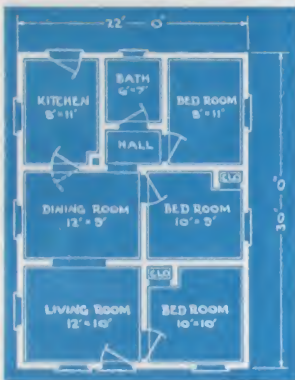

The Elmhurst

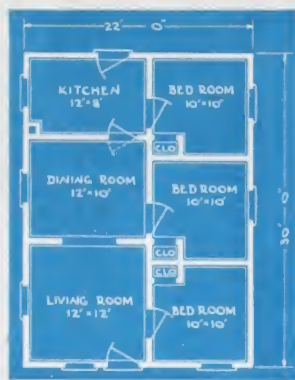

FOUR designs to choose from, each 22 x 30 feet, all priced the same. Plans 3 and 4 have basement stairs provided. A trap door and stairs to basement may be ordered for Plan 1 and 2, at a small additional cost.

The pergola type verandah is 14 x 8 feet, having a tight and weatherproof roof. Verandah quoted separately.

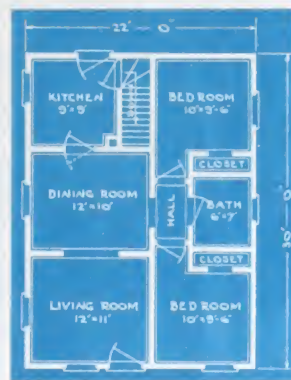

We will REVERSE the Plans of any Aladdin Home, without charge.

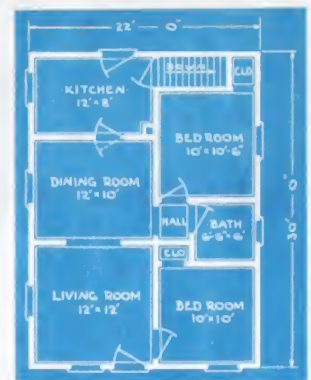

ELMHURST No. 1

ELMHURST No. 2

ELMHURST No. 3

ELMHURST No. 4

The Cedars, 27 (with upstairs)

QUITE frequently we receive requests for a Cedars with bedrooms upstairs. Carrying out our policy of supplying homes which fulfil in every way the requirements and wishes of our customers, we have prepared plans of a home, known as the 'CEDARS 27' which provides, on the ground floor, just the same accommodation as the Cedars (shown on the opposite page) and also provides two additional bedrooms upstairs. This is effected by increasing the pitch of the roof and by other means. Windows are provided in the gable ends to light these bedrooms.

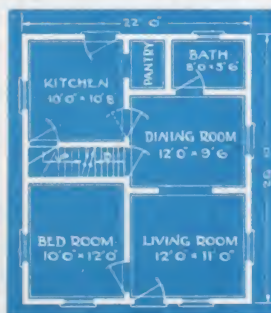

Two alternative ground floor Plans of the Cedars 27 are shown, known as H and J. Note particularly that if desired to have bedrooms upstairs

The Cedars 27, Plan J, has a living room, kitchen, bathroom (which may be converted without additional expense into a pantry) and two bedrooms downstairs and two additional bedrooms upstairs, that is, four bedrooms in all.

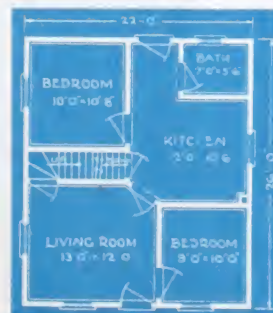

The prices of the Plan H and J are a little higher than for the other Cedars plans, due to the additional materials required to give the two extra bedrooms upstairs.

If desired, either of these plans may be ordered without the materials for finishing off the upstairs, for which reason these materials are quoted separately in the price list. The door provided at the foot of the stairs shuts off the upper floor if it is not required.

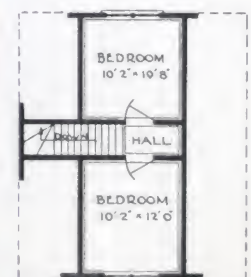

It takes the same verandah as the Cedars. The verandah is, of course, optional.

FLOOR PLAN H

FLOOR PLAN J

Suggested Second Floor Plan

This Attractive Bungalow—Unsurpassed for a Real Home

The Tacoma

THIS beautiful bungalow owes its unusually attractive appearance to its wide roof overhang, its numerous well proportioned and contrasting windows and the effective step rails and verandah battlement rail. The window flower box is also an artistic feature.

The verandah, 14 ft. x 8 ft., under the main roof, with battlement railing, readily screened in if desired, sheltered on two sides from disagreeable winds offers welcome and shelter to the arriving guest, and, supplied with porch chairs and ham-

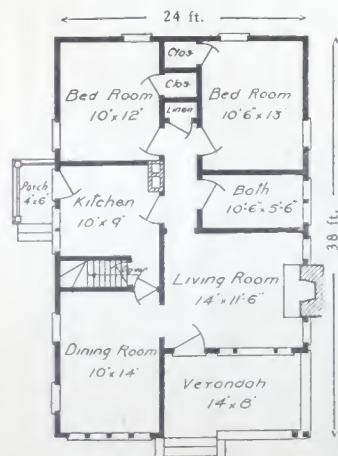

mock, is an important feature of this bungalow in pleasant weather.

Floor Plan A has a living room, dining room, kitchen, two bedrooms and a bathroom, all good sized rooms, well lighted and conveniently arranged.

Floor Plan B has a large combination living room and dining room 14 ft. x 20 ft. and the kitchen is moved to the rear of the house.

In both plans the bathroom can be reached from either bedroom, without passing through living room or dining room.

Three Bedrooms can be provided in plan B if the bathroom is not required.

FLOOR PLAN A

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir flooring, at an added cost, which will be quoted on request.

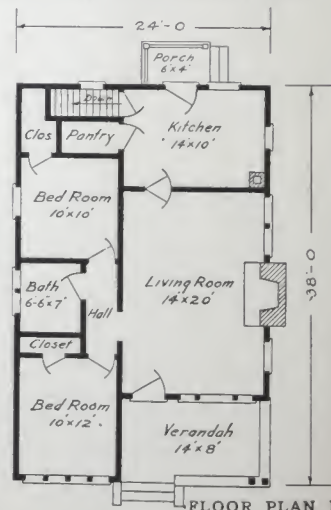

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

We will REVERSE the Plans of any Aladdin Home, without charge.

ALADDIN HOME BUILDERS' SERVICE

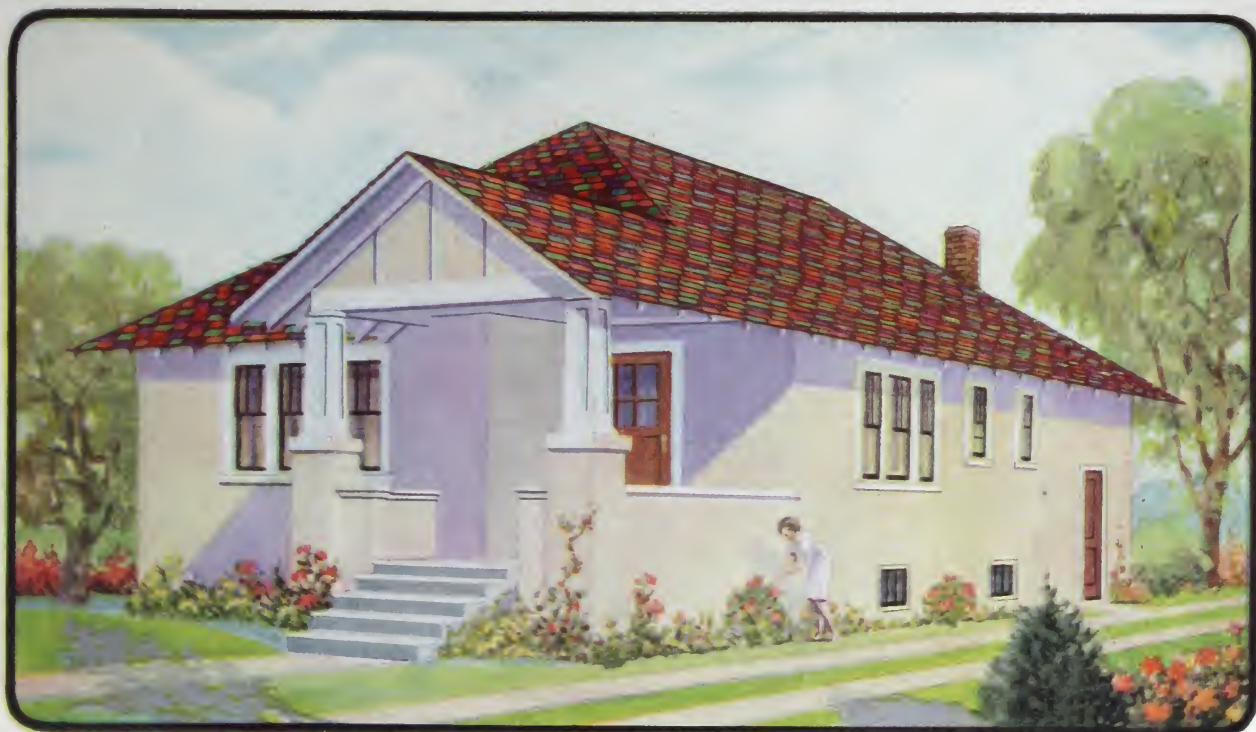

We have, for each Aladdin Home, the most complete and detailed information which we would like to send to you. It will enable you to know just what the finished cost of your home is going to be, under your local labor conditions and rates of pay.

When you have chosen the home you prefer, it is important that you let us send a blueprint Foundation Plan, with details and quantities of materials required to build it, also instructions for laying out the building lines, making the excavation, putting in the walls and laying the cellar floor. It is possible that this work will be let to a contractor and it is important that the owner should know how the work should be done and what it will cost. Full information is included regarding chimneys, fireplaces, etc.

FLOOR PLAN B

An Appealing Home—See Price List

The Rosedale

(Stucco or Frame)

IN this "Home" the real meaning of the word is apparent. It is "a gem of a home" which gladdens the hearts of its proud owners. Those who live in such homes are invariably the substantial type of citizens who place their home first in every consideration. And because of this they are the backbone of every community.

The Rosedale is a bungalow, true to type in every detail. For planning and convenience the housewife will agree this layout is perfection.

Spacious living room and dining room, properly arranged across the front of this home, each extra well lighted with three windows, a large kitchen and two fine bedrooms, each with a clothes closet provide complete accommodation. There is also a front vestibule, a handy coat room, large bathroom and a grade entrance at the rear giving direct access to the kitchen and to the basement.

The cottage roof and wide over-hang of the eaves gives the homelike air. The square verandah is part of the house, and is included in the quoted price.

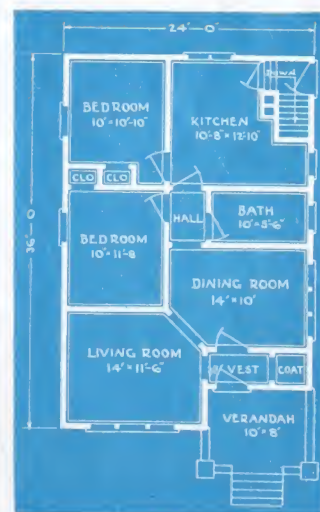

Nothing which will add to the beauty and attractiveness of this model bungalow has been overlooked. See the many artistic windows, the unusual verandah with attractive battlement rail, piers and columns. The whole house has artistic

lines which lend dignity and distinction. All-in-all, the Rosedale is "quite out of the ordinary" yet a solid sensible home that anyone will be proud to own.

If siding or shingles are preferred for the exterior walls, instead of stucco as illustrated, they will be supplied at small additional cost.

If you like this house, but require more bedrooms, or to have the bedrooms upstairs, please refer to the "Windsor", illustrated on Page 2.

Unless otherwise requested all Aladdin Homes are roofed with Clear Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

FLOOR PLAN

ANY ALADDIN HOME MAY BE REVERSED, WITHOUT CHARGE

A Lovely Home You Will Be Proud To Own—See Price List

The Dorval

THERE are many features which contribute to the charm of this roomy Home. The spacious sunny verandah offers an open-handed welcome, and the many windows provide the "living sunlight" within.

The proportions of the house are balanced to perfection and it is to this balance that the house owes its appearance of clean-cut poise.

In the Dorval the living room is just the right size; the dining room and kitchen are just in the proper degree smaller and are ideally located for convenience; the bedrooms are all good with one a little better for the master of the house; all the extras, like closets, hallways and stairs have been taken care of in a minimum of space, yet without crowding, the windows of the exterior are uniformly and symmetrically distributed instead of being bunched in one spot at the expense of a broad stretch of wall that is barren of openings.

The casement windows shown in the illustration are replaced by sliding sash windows of a similar pattern, the upper sash divided into small lights.

The Dorval is a shining example of the perfection of proportion which is necessarily achieved when methods of design are natural and true.

The grade entrance shown in the illustration is an attractive and useful feature.

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir Flooring, at an added cost which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

We will REVERSE the Plans of any Aladdin Home, without charge.

WHAT ALADDIN HOME OWNERS SAY

A "Satisfied Customer"—

"We have been living in our Holmwood since September, and are very much pleased with it. Everything went together fine. The lumber was good and there was lots of it; plenty of everything. You can put us on your ever-growing list of satisfied customers." J. J. EVAN, Druid, Sask.

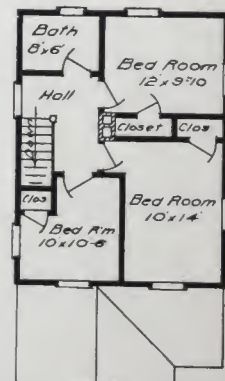

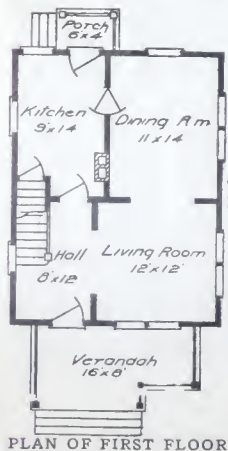

The accuracy of the cutting "was simply wonderful"—

"I purchased from the Aladdin Company your 'Wabash' home and built it myself according to your system of house-building. I take great pleasure now in testifying to my entire satisfaction with everything connected therewith. I found the Company courteous and generous, giving plenty of everything. The quality of the material was all that could be desired; and the accuracy with which each piece fitted into its appointed place was simply wonderful. If I were going to build again, I would follow the same course." JAS. MALCOLM, Agincourt, Ont.

Exceptional lumber—

"I have duly received the house and I am more than pleased with it. The lumber is far in advance of what we get here. Will you please send me two more catalogues as I have already got two friends who I think will go in for similar houses."

R. W. WATSON, Trail, B.C.

A Commodious Bungalow with Soft-toned Coloring—See Price List

The Wabash

THE beauty and long life of Cedar shingles have given great vogue to their use as a wall finish. When walls and roof are both shingled and stained, a soft and mellow effect is had which blends perfectly with the lawn, flower beds, shrubs and trees, and the ideal result is achieved of a home which is part of the landscape. This bungalow so finished will grace any community or any setting. It should be placed on a lot not less than thirty-five feet wide and if possible on ground somewhat higher than the road.

It provides a splendid home for a family of five or six with every convenience that such a home should have.

The verandah is large and beautifully ornamented with columns, lattice, rail, and balusters. The living room and dining room are each a good size and are connected by a wide framed opening which permits of their being used as a single room if desired. There are three bedrooms, each with a good closet and an extra closet opening from the living room to be used for coats and hats. The kitchen has a pantry and opens to the cellar stair and on to a covered porch. All three of these features are great conveniences.

The photograph of this home shows the walls finished with British Columbia Cedar Shingles. If you prefer siding we will supply it without extra cost.

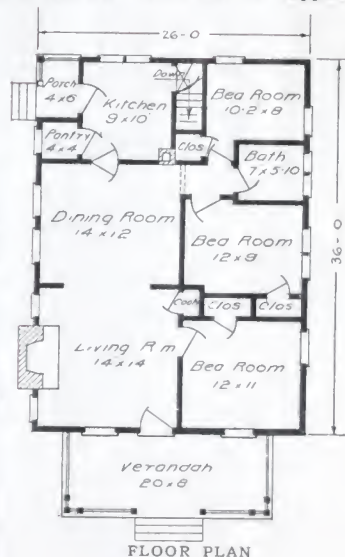

French Doors opening to the verandah are shown in the illustration above. The Floor Plan does not show them, as

in most cases they are not desired. They will be supplied, if required, at a slight additional charge.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, if desired, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

We will REVERSE the Plans of any Aladdin Home, without charge.

COST OF ERECTION

"What does it cost to erect an Aladdin Redit-Cut house?" is a question that every prospective buyer will ask.

One-storey Bungalows of the type of the design Bluebird will cost to erect, about 25 per cent. of our price.

The Edmonton and other two-storey houses will cost 25 to 30 per cent. of our price.

These costs will vary with one thing only—the industry of the workmen. All the materials for the whole house are lying sorted, bundled and marked, ready to hand. The position in which they are to be placed is graphically shown on the

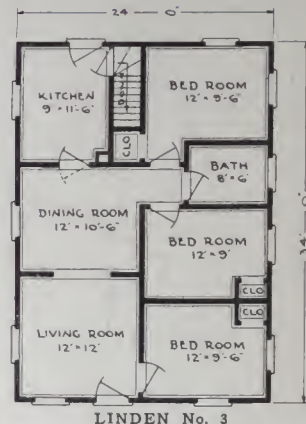

plans. There is no excuse for delays or loafing on the job. The materials can be placed just as fast as nails can be driven.

We are prepared at all times to give detailed estimates of the costs which enter into the completed house. Labor and material costs vary from time to time in different communities and our estimate will be made on the general average as we find it.

Write us as to the design which you favor and we will send you the complete building data for it.

The Linden

THIS is a new design typifying the modern home, as arranged and built today. Studying its easy arrangement of the necessary rooms one wonders that only recently have homes been planned to give so much convenience, such sunny interiors and at so little cost.

To ensure that the requirements of every one will be satisfied, three sizes are shown.

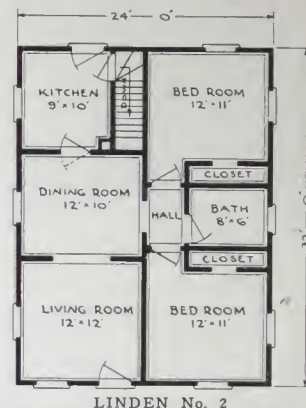

The Linden No. 1 and No. 2 differ only by two feet in depth, and that No. 2 has a basement stair provided. They each contain a spacious living room, dining room, kitchen, two bedrooms, bathroom opening from the central hall, and spacious closets from each bedroom.

The Linden No. 3 is 24 x 34 feet, and three bedrooms are provided.

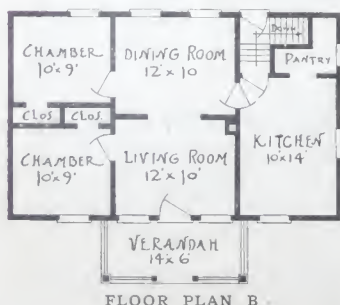

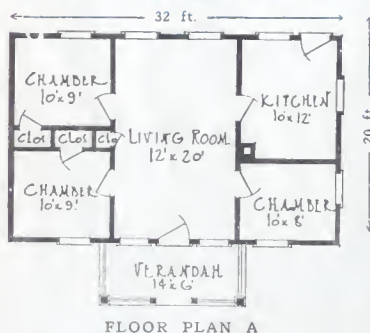

The verandah, as shown, is 12 x 8 feet. See Price List.

If a larger verandah is desired selection may be made of the verandah shown on page 25 at the price quoted for this verandah in the price list.

If the corner verandah piers, shown in stone in the illustration, are not desired, we will supply full length corner columns, extending down to the verandah floor, without additional charge.

The Inglenook

This design is born of the constantly increasing demand for an inexpensive bungalow with large combination living and dining room, kitchen and three bedrooms. It is as compact, well lighted and easily heated as any house you ever saw. See detailed Specifications on Page 17.

The verandah is quoted separately in the Price List. We strongly recommend building it, however, with the house, as it adds so much to the general appearance and utility.

Unless otherwise requested all Aladdin Homes are roofed with Clear Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

A Storey-and-a-half House with Bungalow Lines

Note particularly—All bedrooms have full-height ceilings.

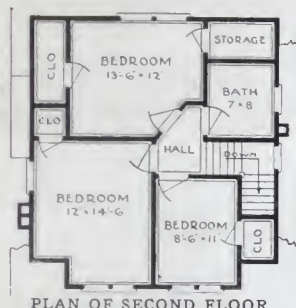

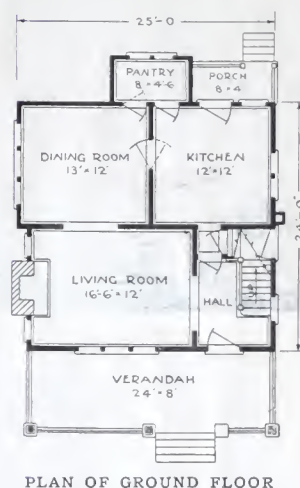

The large verandah, size 24 ft. x 8 ft., and the rear porch are included in the quoted price.

The side entrance, at grade, is a feature appreciated by all, affording direct access from outdoors either to the kitchen or directly to the basement.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, if desired, at an additional cost, which will be quoted on request.

See specifications on page 17

We will REVERSE the Plans of any Aladdin Home, without charge.

The New Brunswick

THE New Brunswick is one of our most popular homes, due principally to the fact that it is a splendid example of the "semi-bungalow"—the storey-and-a-half house with bungalow lines—and to its excellent floor plan.

It contains a large, bright living room and dining room; a kitchen 12 feet square; a pantry, an inside cellar entrance, a front hall for privacy, access from kitchen to front door without going through dining room; three bedrooms in graduated sizes—all with closets; a large front verandah and a small rear porch and a bathroom over the kitchen.

TWENTY YEARS OF ALADDIN SUCCESS

Aladdin Homes—the Aladdin Read-Cut System—may be new to you, but it was planned and put in operation twenty years ago. Its merits and its wonderful simplicity were immediately recognized by the public. The result is that each year shows a big increase in the num-

ber of Aladdin Homes erected and in the large number of delighted Aladdin Home owners.

You know that this wonderful growth would not be possible unless real service was given—unless honest value, square business methods and integrity prevailed—unless Aladdin customers became Aladdin friends.

THE ALADDIN SYSTEM IS BUILT ON THIS PRINCIPLE

Modern power-driven machines can do better work at lower cost than hand labor. Then every bit of work that can be done by machines should be so done. The steel worker with a little hacksaw trying to cut and fit the steel girders of the modern skyscraper would be no more out of place than the modern carpenter cutting sills, joists and rafters. The skyscraper framework

is cut to fit by machines in the steel mills, marked and numbered, ready for erection. The lumber of the Aladdin house is cut to fit by machines in the Aladdin mills, marked and numbered ready for erection. The steel system is thirty years old—the Aladdin System is twenty years old.

ALADDIN HOMES—BEST THAT MONEY CAN BUY

An Aladdin Home differs only in one particular from the very best house that the most capable builder erects. It is built of the same joists, studding, rafters, wall sheathing and siding, flooring, doors, windows, stairs and trim that are built into the best houses you have seen.

The only difference between an Aladdin Home and the best house constructed in the old-fashioned way is the method by which the finished result is accomplished, at much lower

cost. Aladdin Homes are BETTER than ninety per cent. of the houses regularly built in any community.

The low cost of Aladdin Homes is achieved mainly by so arranging all designs to cut without waste, cutting our materials in large quantities by the most modern machinery, and by using all raw materials in volume at the lowest possible price consistent with the high Aladdin standard.

THE SPANISH RIVER PULP AND
PAPER MILLS, LIMITED
SAULT STE. MARIE, CANADA

Canadian Aladdin Co., Limited,
Toronto, Canada.

Dear Sirs:—

We would like to express our general satisfaction with the types of Aladdin houses erected for this Company at Espanola. Last year you constructed for us 37 houses at Espanola and from our experience with them we felt that by this type of construction we were able to get a uniformly good design, first class service, and prompt delivery, and that the material used in the construction of these houses is first class in every way; in view of our last year experience, we have this year placed an *additional order for 51 houses.

Yours truly,

SPANISH RIVER PULP AND PAPER
MILLS, LIMITED

Per C. H. L. JONES, Manager.

* Subsequent orders brought the total up to
130 houses.

A Quaint Colonial Bungalow—4 Fine Plans—See Price List

The Dorchester

**VERY WELL LIGHTED ON ALL SIDES,
CONVENIENTLY PROPORTIONED—
A HOME IN EVERY SENSE**

THE DORCHESTER is a master design. Serviceability, comfort, beauty—these three—if properly co-ordinated give happiness and gratification to the home owner. The Dorchester is a master example of them all.

The verandah, which is quoted separately in the price list, presents an attractive feature which may be added, if desired, at low cost. It is designed in pergola style, but with covered roof to protect from rain and sun. Size 12 feet by 10 feet 6 inches.

Quotations furnished upon request for finishing exterior in stucco, shingles or brick veneer.

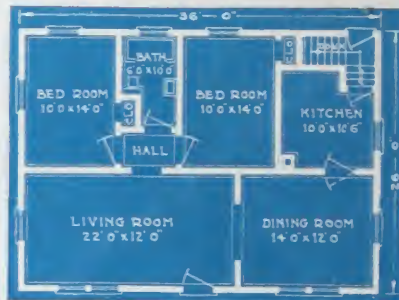

We will REVERSE the Plans of any Aladdin Home, without charge.

DORCHESTER, PLAN A, having three bedrooms, provides full accommodation for a family of six. The living room is square, 14 x 14 feet, lighted on two sides, with wide archway to the dining room 12 x 16 feet. An inside cellar entrance is provided, opening from the kitchen. In fact, everything one can wish for is here, and conveniently placed to reduce house work to the minimum.

PLAN B. A large living room, 22 x 14 feet, with fine light and convenient access to other rooms, is a delight to the family. The well proportioned dining room—these two rooms occupying the full 36 feet of house frontage.

The two bedrooms, each 10 x 12 feet, are conveniently arranged with bathroom between. If an open fireplace is desired in the living room, an ideal location for it is indicated on the plan.

PLAN D has a living room, dining room, kitchen, two bedrooms, and a bath. The living room is large and well lighted. A cellar stairway with grade entrance door opens from the kitchen. Each of the bedrooms has a closet and there is a hall which gives private access from the bedrooms to the bathroom. The floor arrangement is particularly good, omitting no essential of a complete home.

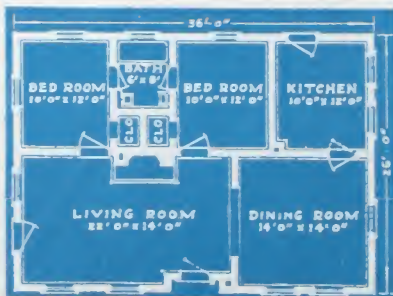

THE DORCHESTER—PLAN D

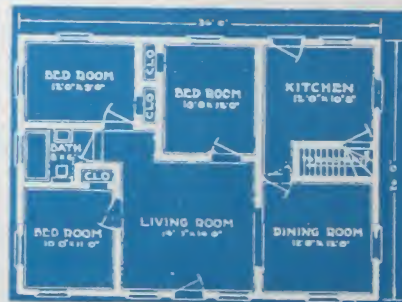

PLAN C is a unique and convenient arrangement providing three well planned bedrooms, a bathroom opening from a central hallway so that the door to it is not visible from any of the other rooms, a large living room 14 feet square, a dining room of ample proportions with a double swing door leading to the large kitchen. Note the convenient cellar stairs leading down from the kitchen.

THE DORCHESTER—PLAN A

THE DORCHESTER—PLAN B

THE DORCHESTER—PLAN C

A Fine Dutch Colonial Type—A Big Home for little Cost—See Price List

The Capitol

THE charm of the Dutch Colonial never fades. The early Dutch settlers along the coast of New England developed this type, distinguished by its gambrel roof, shingles and broken roof lines. Aladdin designers have held true to this inspiration while actually giving full dimensions to the second floor in height, breadth and depth. No space is lost, ceiling being full height and square, yet the true gambrel type roof is maintained. Note the protected entrance, columned and inset—a true Colonial approach.

Examine minutely the placement of the rooms. Can you conceive a higher degree of perfection? The entrance hall with semi-open stairway and cloak closet demand your admiration the minute you enter. Arches lead to the right and left into the living room and dining room. Think of the possibilities of a living room 26 feet deep and 14 feet wide! Leading from this interesting room is a library or den. On the other side of the house is found a pantry, separating dining room and kitchen, with cellar entrance under the main stairway. There are six rooms on the second floor—and closets. It may be called a twelve-room home, and at a price that is unapproachable through any other source. The covered pergola porch is 12 ft. x 10 ft. 6 in. and the porte cochere at the opposite side of the house, also covered, is 12 ft. x 10 ft. 6 in., providing a covered driveway, giving entrance protected from the weather.

READ THESE INTERESTING DETAILS

Size of the Capitol is 36 x 26 feet. Height of ceilings 8'-6" on first floor and 8 feet on the second floor, being full height all over, and not sloped. The eaves are boxed. Floors, upstairs and down, edge-grained Fir tongued and grooved flooring. Clear Cedar siding for outside walls painted two coats. Outside finish all No. 1 and high grade interior trim, taking a beautiful finish. Roof sheathing laid tight and covered with XXX B.C. Cedar shingles.

LIVING ROOM—THE CAPITOL

Windows are check-rail, size of glass in each sash 24 x 24 inches. The front and side doors have upper half glazed. Attractive stairway as shown on the plan. Cellar stairs under main stairs; 4 foot cased arches where shown on plan. Two coats of paint supplied for the exterior. Stain or paint for interior trim and doors. Complete with all nails, mortised lock sets, hinges and double-acting floor hinges, and sash locks to complete the house. You will agree—an ideal home—an arrangement difficult to equal—an exterior distinctive and appealing to every one's taste. Anybody would be proud to own it.

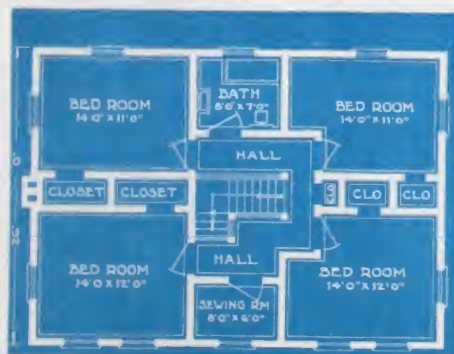

Quotation for stucco or brick veneer for exterior finish will be forwarded upon request.

The pergola porch and porte cochere are not included in the price quoted for the Capitol, as in many cases it is not desirable, due to the size or location of the building site, to add them, but they will be supplied at low cost, as quoted separately on the price list.

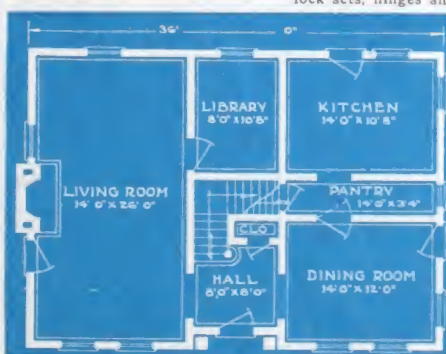

Hardwood flooring will be supplied, if desired, instead of standard Edge Grain Fir flooring, at an added cost which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

We will REVERSE the Plans of any Aladdin Home, without charge.

PLAN OF SECOND FLOOR—THE CAPITOL

PLAN OF FIRST FLOOR—THE CAPITOL

A Real Gem—Five Plans—See Price List

The Columbia

THE savings after building a small home, will add more to your happiness than the luxuries of a big home.

Later successes and necessities may make possible a larger and more ambitious house, but the "Columbia" is a first home—it conserves expenses, inspires thrift—and saves money.

FOUR FLOOR PLANS ARE PRESENTED, THEY ARE ALL PRICED ALIKE

It is simply a matter of determining which one will best serve the requirements of your family.

For a small family the "Columbia" is hard to equal. It breaks through the clouds of obstructions, high prices, middlemen's profits, architects' and contractors' fees and opens up the big opportunity to "Start Right Now", to start with less than you thought possible—a very modest amount.

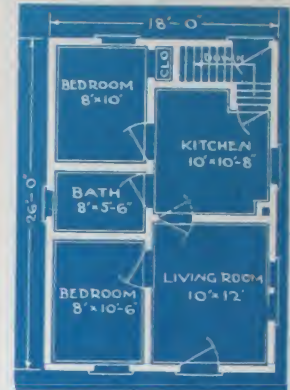

Wise is the man who arrives at the momentous decision "to own his own home"—to give his family the comfort and satisfaction of "living in their own home".

If stucco, shingles or brick veneer is preferred for the outside walls, in place of siding as shown in the illustration, prices will be quoted upon request. The verandah, size 14 x 7 feet, is priced separately. The Columbia may be ordered without the verandah, if desired.

We will REVERSE the Plans of any Aladdin Home, without charge.

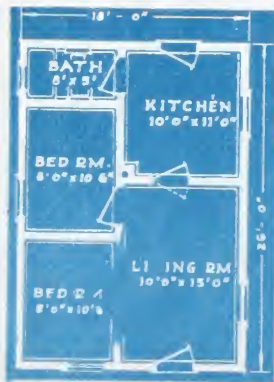

COLUMBIA SPECIFICATIONS

The siding for outside walls is clear and knotless cedar. Roof sheathing boards are laid tight, with XXX B. C. Cedar Shingles laid over them. Windows are check-rail, size of glass in each sash 24 x 24 inches. Bathroom supplied with swinging casement, glass size 18 x 24 inches. Flooring is edge grained Fir, Tongue and Groove. All interior trim is well finished. Front door has upper half glazed. Cased arches, furnished where shown on plans. Height of ceilings 8 feet. Roof is one quarter pitch. For full detailed specifications, see page 17.

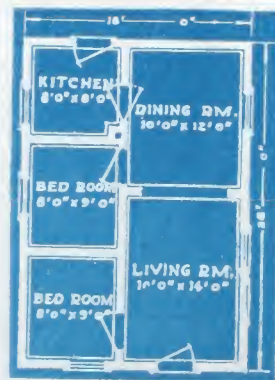

COLUMBIA K

Plan K combines a large kitchen, an even larger living room and two fine bedrooms. The bathroom makes a fine pantry if a bathroom is not required. Note the grade entrance and cellar stairs.

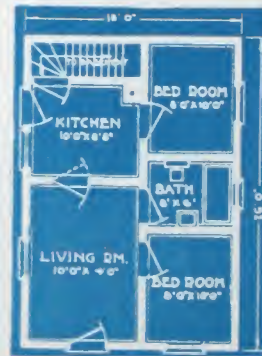

COLUMBIA C

The rooms in plan C are proportioned differently although of the same accommodations as shown in plan K, without the cellar stairs.

COLUMBIA D

Columbia D gives big living room and dining room, with two bedrooms and kitchen. This type is desirable for those who are unable to obtain water or sewerage for modern conveniences.

COLUMBIA J

Columbia J is designed with inside cellar entrance and includes a two bedroom plan. It can be faced either way on your lot by transposing door and window in living room.

COLUMBIA JUNIOR

The "Columbia Junior" provides a smaller home, size 18 feet square, at a lower price (see price list). The same verandah as illustrated on the Columbia, size 14 x 7 feet, may be ordered with the "Junior", or a 6 x 4 foot entrance hood at \$15.00, and a 6 x 4 foot stoop with steps, 4 feet wide, at \$23.00, may be desired instead of the verandah.

A Splendid Two-Storey Room Home—See Price List

The Liberty

THE LIBERTY, a strong, substantial, dignified and complete Canadian home! Thus might be described in one sentence, the splendid Liberty. Examine minutely every feature of the Liberty. Clean, square lines, well proportioned walls and roof, regular placement of windows, blend into perfect harmony. The verandah, size 16 x 8 feet, is quoted separately on the price list, for those who wish to order it with the Liberty. It can be built on later, at any time, if preferred. See page 17 for specifications.

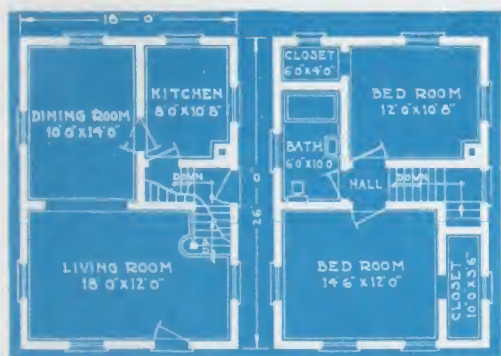

Unless otherwise requested all Aladdin Homes are roofed with Clear Cedar Shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

THE LIBERTY—PLAN D

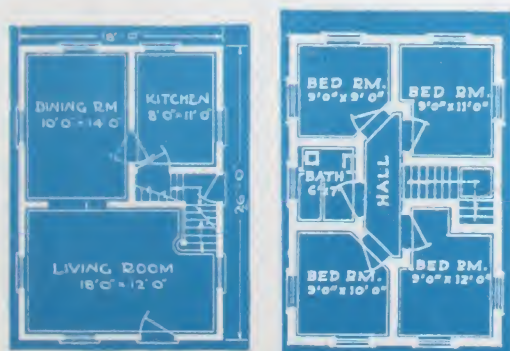

A plan specially arranged for those who require only two bedrooms, but want them larger. Extra large clothes closets are provided off each bedroom. The three rooms downstairs are a splendid size. Every requirement has been provided for here.

THE LIBERTY—PLAN B

A handsome semi-open staircase leads from the generous living room to second floor, where are found three bedrooms, bath and splendid closets. A pantry and rear porch are desirable features of the first floor.

PLAN D—FIRST FLOOR PLAN D—SECOND FLOOR

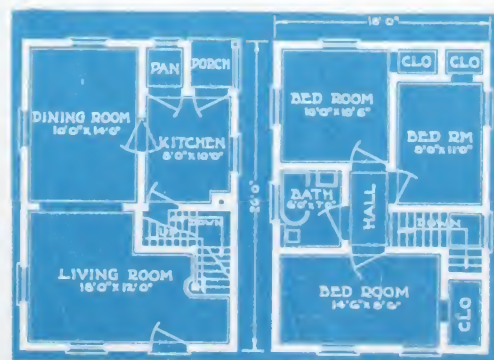

PLAN A—FIRST FLOOR PLAN A—SECOND FLOOR

THE LIBERTY—PLAN A

For those whose necessities require four bedrooms, the Liberty Plan A has been devised by our designers. Think of it! Living room, dining room, kitchen, bath and four bedrooms, all included in a house of the dimensions of the Liberty, and more remarkable still, at such a low cost. This home is big enough for a family of eight and offers all modern conveniences.

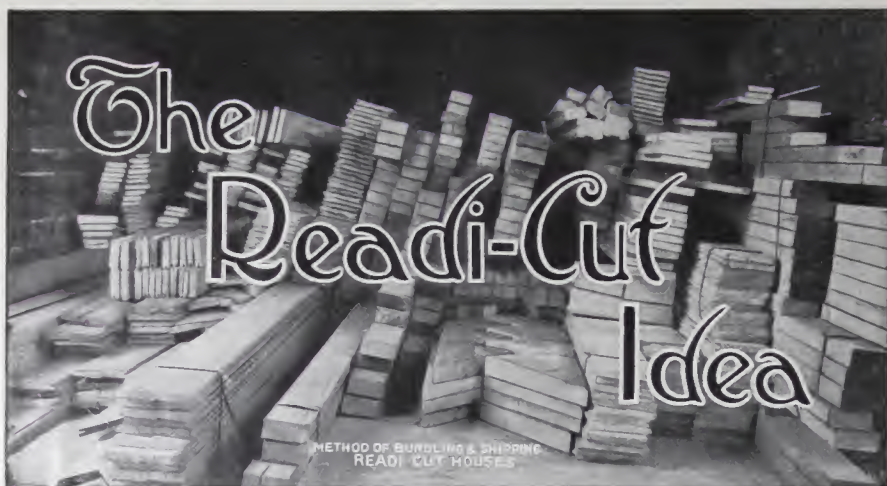

We will REVERSE the Plans of any Aladdin Home, without charge.

PLAN B—FIRST FLOOR PLAN B—SECOND FLOOR

You Will Save One-Third on Your Finished Home

Where the Saving Comes In

First—We buy raw materials in large quantities, at the lowest prices obtained by big manufacturers.

Second—We buy for cash and cash commands a premium at all times.

Third—Our Mills are in the centre of lumber producing districts. Your lumber comes to you by the shortest route from the woods.

Fourth—In our mills we use high speed automatic machinery. Unskilled labor is quite good enough to put the major part of the material in place after it arrives on the building site.

Fifth—We do in our Mills two-thirds of the actual labor.

Sixth—We cut in half the cost of the labor that is still necessary.

Seventh—We eliminate the waste pile. Around every completed house built by the old method there has accumulated a pile of waste material. This is due to four causes:

- (1) Careless designing.
- (2) Careless figuring of quantities.
- (3) Careless use of unsuitable lengths.
- (4) Careless errors in cutting.

The purchaser of an Aladdin Home buys and pays for exactly enough material to build his house, plus a small addition to guard him against delay due to any unfortunate accident on the job.

IN BUILDING by the old methods you would probably buy your window and door frames made-up—possibly you would have your main and basement stairs partly worked out—you would certainly buy your doors, columns, and newel posts finished, and you would have all your mouldings run at the mill. *That is—you would buy these items Readi-Cut, or partly so.*

The reason being that a mill equipped with modern power-driven machines can do better work at a lower cost than hand labor. Every bit of work that can be done by machines, *should* be so done.

ALADDIN HOMES ARE COMPLETELY READI-CUT

Building an Aladdin Home you will make the same savings on your whole bill of material that you now plan to make on a few items.

It is the system that has made the great structural steel buildings possible—applied to frame construction.

Your complete home, from sills to ridge, will be turned out in our mills, readi-cut.

You will get all paint and hardware down to the smallest nail and hinge.

You will get all interior trim.

You will first receive foundation plans and instructions so that this work may be completed in advance of the shipment.

You will get a graphic set of plans on which is indicated the location of every piece of lumber in the house.

You will get a set of simply worded instructions which are so clear that the house is built with ease.

You get the complete house ready to be nailed together and occupied.

The work of building the house is two-thirds done before we ship the materials.

You are saved two-thirds of the work and the cost of the one-third that remains is cut in half.

Most of the work of placing the materials can be done by any man who can read and drive nails.

See "Your Money Back Unless You Are Satisfied", our Guarantee on Page 31.

Locating Each Piece Simplicity Itself

The Simple Plan of Laying Out Material on the Site

No difficulty whatever is experienced in locating the materials in the order required. By easily following the simple instructions, sent with every Aladdin home, for laying out the materials at the building site, it is only the matter of a moment to lay your hand on each piece as required, and to nail it into position. You save all the time figuring out, measuring and sawing each piece to make it ready for position. All this we do at our mill before shipping.

CUTTING THE "CUTTING COSTS"

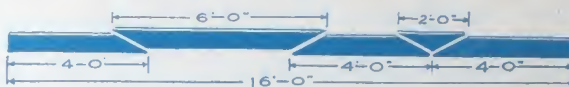

We illustrate below one of the many minor economies which become possible in mills such as ours which are day after day repeating the same operations. It is natural that each workman should become an expert in his own particular duty, with the result that he discovers short cuts, and develops simple methods for the saving of time and material.

board, and a two-foot board and cuts them this way: The carpenter requires twenty feet of lumber for the job. We take a sixteen-foot board and cut it this way:

FOR EXAMPLE—TWENTY FEET OF LUMBER FROM A SIXTEEN-FOOT BOARD—HOW IT IS DONE

To cut the sheathing for this gable, the carpenter usually takes an eight-foot board, a six-foot board, a four-foot

and get twenty feet of lumber at the cost of sixteen feet—and YOU get the saving.

We Absolutely Guarantee to Furnish Sufficient Material to Finish the House in Accordance with the Following Specifications.

THE MATERIALS WE USE

LUMBER—Every piece of lumber in an "Aladdin Home" has been carefully selected from thoroughly first-class stock, especially selected for quality. It is inspected by experienced men, and if not up to a high standard is not used. This is an extremely important point, and you should consider it carefully. Our facilities for buying high grades are unexcelled by any manufacturer in the country. This means much to the purchaser—to know that all the materials are the best, that they are well seasoned, sound, and of first quality throughout. All trim material is No. 1 stock and in common with Doors, Sash and Stairs is given a beautiful finish. You will have absolutely no cause for complaint of any of the materials supplied by you. Can you say as much of those that can be purchased in your neighborhood?

HARDWARE—Our hardware comprises nails of all sizes and kinds required in doing a first-class workmanlike job—glass for windows and glass doors—galvanized iron flashings for hips, chimneys, and window and door openings—window and door hardware in brush brass of suitable size and pattern.

PAINTS—For all our houses we supply the very best quality of ready-mixed paints or stains manufactured or sold in Canada—pure linseed oil—orange shellac—and where specified, the best quality of shingle stain.

PLASTER AND STUCCO—We do not regularly supply lath or plaster for the interior unless specially requested to do so, as we have found that more satisfactory results are obtained if the local plasterer supplies his own materials. Some owners prefer to use plaster board, or other wall finishes which can be included with the shipment if desired.

When the outside walls are to be stuccoed we supply lumber for sheathing, Aladdin Heavy Interwall Insulation and metal lath, but not the stucco materials, which are supplied and put on by the plasterer.

MASONRY—All excavation and masonry work must be done on the site. No money would be saved by our including stone, brick or concrete, for every section of the country produces these materials and prices vary but little. We furnish the foundation plans and will give you estimates, if desired, on the quantities of materials required. Fireplaces and chimneys can be placed wherever wanted in Aladdin homes.

The ALADDIN HOME at a Glance

An Aladdin Home is exactly the same house that would be erected by a builder in the old-fashioned way.

It is not "Sectional" or "Portable" and cannot be taken apart except as you would tear apart any other good house.

It is built from the same joists, studs, rafters, wall sheathing and other materials that a carpenter would use to build the house from the uncut material.

It is identical with the best frame, brick veneer or stucco construction.

Your saving lies in the elimination of waste and unnecessary profits and in the reduction of the amount of hand labor.

WE SELL

the complete materials, READY-CUT in our mills, for substantial, warm, comfortable, attractive homes. The materials come to the building site clearly marked and carefully sorted so that the work of erection goes forward with speed and precision.

GUARANTY

Read our complete "Money Back" guarantee on page 31.

YOU GET

Sills, cut to fit.

Joists, floor and ceiling, cut to fit.

Rafters, all accurately cut to fit.

Studding, wall and partition, cut to fit.

Gable Studding mitred to slope of rafters.

Sheathing Lumber for outside wall, cut to fit.

Siding, clear and knotless Cedar siding.

Flooring, matched and bundled.

Shingles, XXX B. C. Cedar.

Porch Flooring, cut to fit and bundled.

Porch Columns, porch joists, hand-rail and balusters, cut to fit.

Steps for front and rear, cut to fit and bundled.

Outside Finishing Lumber, cut to length, bevelled and bundled.

Glass and Paint.—We supply Star and Double Diamond glass for all windows and glass doors, which are shipped glazed. We supply best quality ready mixed paint, linseed oil and shellac for two coats for the outside body of the house, outside trim, verandah floor and steps and verandah ceiling. For houses in Ontario, Quebec and the Maritime provinces we supply two coats of paint for interior doors, trim and base. For houses supplied to British Columbia and the Prairie provinces, we supply either two coats of paint or oil stain, shellac and varnish for the doors, trim and base.

SUMMER COTTAGES

A separate booklet is ready to be mailed to you, if you are interested in summer cottages. Aladdin Summer Cottages are single walled, exposed studding, single matched ceiling partition, with rooms open to the rafters.

Moulded Base Board and Quarter Round for interior walls.

Corner Base Blocks.

Bed Mould, Cove Mould, etc.

Skirting Board and Drip Cap for outside walls, except on some shingled houses.

Stairways for all two-storey houses, with the necessary newels, hand-rails and balusters, bundled, cut to fit.

Doors and frame, and trim both sides, cut to fit and bundled.

Windows with sash complete, shipped glazed, frame and trim cut to fit and bundled.

All Hardware, including mortise locks, knobs, hinges, window fittings, galvanized iron flashings, building paper and Aladdin Heavy Inter-wall Insulation.

Nails of proper size for the entire house.

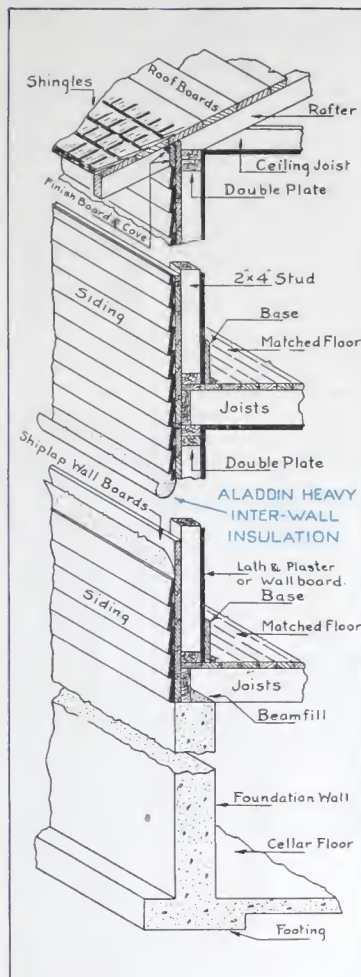

Paints, best ready mixed, for two coats for the woodwork of the outside walls, trim, verandah floor and steps, and for the woodwork of the interior trim.

Lath, Wood or Metal, supplied for outside walls when the house is to be finished with stucco.

HOW TO PAY

Prices and Terms of payment are shown on the Price List.

Prices quoted cover delivery of the shipment to the Railroad siding nearest your building site with the freight charges prepaid. (British Columbia excepted.)

OUR STANDARD CONSTRUCTION

We furnish matched floors for both floors of all our homes, and our outside walls, as shown by accompanying cut, are the last word in building construction. A plate is laid on the floor, and studding is set on this so that when the sheathing, Aladdin Heavy Inter-Wall Insulation and matched siding are placed on the outside of the studding, and the inside wall finish on the inside, the spaces in the wall between the studs are air-tight chambers which insulate the building from extremes of hot and cold weather better than solid brick. This construction, known and approved by the Building Departments of the Cities, and the Insurance Companies as a fire stop construction, prevents the circulation of air in the walls, and is ample to make our dwellings warm in the coldest climate.

OUR REFERENCES

The Standard Bank of Canada, or any purchaser of an Aladdin Home.

Dimensions of rooms on Floor Plans are inclusive of the Frame Work.

Foundations—When the house is to be placed on cedar posts or concrete piers we supply the necessary sills. When the house is to go on a masonry foundation, we supply a heavy centre sill only. We, of course, do not supply stone, concrete or brick for foundations, as they can commonly be purchased as cheaply in one locality as another. Do not start to put in your foundation without getting our blueprint Foundation Plan and our set of Instructions. The Instructions contain much valuable advice as to laying out of building lines, the making of the excavation and the putting in of foundations of concrete, concrete blocks or bricks; also information and estimates of costs for concrete cellar floors, chimneys, fireplaces, etc.

Joists—Our joists are sized for height and cut to length; and are of a strength in accordance with the best engineering practice.

Matched Flooring—Edge grained Fir, tongued and grooved.

If hardwood floors are desired, ask for quotation.

Studding—2" x 4", dressed to uniform size, placed on 16" centres. All walls and partitions have 2" x 4" sill piece and 4" x 4" cap. Headers are doubled, over door and window openings. All studding is accurately cut to fit.

Exterior Wall Sheathing—The outside walls of all our dwellings are sheathed with 1" No. 1 matched ship-lap dressed, cut to fit, which is covered with Aladdin Heavy Inter-Wall Insulation before the siding is put in place.

Rafters—2" x 4" and 2" x 6", all accurately cut to length, bevelled and notched.

Roof Sheathing—No. 1 dressed Hemlock or Fir. All roofs are close boarded.

Building Paper—Dense, tough fibre paper.

Shingles—XXX British Columbia Cedar. If Asphalt Slate Shingles are preferred, they will be supplied at extra cost. See page 18.

Siding—First quality, clear and knotless bevel Cedar siding.

Porch Columns—Of size and detail illustrated in cuts.

Outside Finish—All No. 1 dressing stock, dressed four sides, and cut to length.

Window and Door Frames—Finest dressing stock.

Inside Wall Finish—Inside walls and ceilings may be finished with lath and plaster, Plaster Board, or any wall finish desired. Prices on Plaster Board will be furnished on request.

Doors—We supply two-panel, clear Fir doors throughout. See illustration of doors and trim on page 19.

Interior Trim—Our interior trim is two-piece, a moulded casing and a heavy back band, finest dressing stock. The trim is cut to fit, ready to be nailed in place.

Moulded Base—We do not cut the base to fit, but we do better—we supply corner blocks, and anyone who has seen Base "coped" in at the corners will realize what an immense saving in time this means.

Finished Hardware—Our lock sets, hinges, window fittings, etc., are all of handsome Brush Brass.

Builders' Hardware—We supply nails of all necessary sizes in excess quantities, galvanized iron, hip, valley and step flashings, and Aladdin Heavy Inter-Wall Sheathing, for insulation against heat and cold.

Summer Cottages

Extra Features Obtainable for ALADDIN HOMES

STORM PORCH.—If a storm porch is required outside the front door to give protection in the winter months from cold and winds, an Aladdin Removable Storm Porch is just the thing to place on the verandah. It may be taken down and stored away in the spring, if desired. Quoted in Price List.

VESTIBULE.—It is a simple matter to arrange an inside vestibule in any Aladdin home, if desired. A standard vestibule 3 ft. x 4 ft. will be provided with half glass interior door, frame and trim, together with the necessary studding. See Price List.

ENCLOSED CELLAR ENTRANCE.—An enclosed outside cellar entrance can be provided for any of our houses. Many customers prefer to have access to the cellar without the necessity of going through the house, and still do not want to be compelled to go out into the open air to get to the cellar. To such, this addition will appeal strongly. This addition, size 7 x 7 feet, is designed to afford a grade cellar entrance and can be attached to any Aladdin house. All material necessary for the complete addition is included, together with steps to kitchen and steps to basement. Ship-lap is provided underneath the siding or shingles on the walls. For price of this addition, see Price List.

Cellar Entrance

Cellar Entrance Floor Plan

GABLE ENTRANCE HOOD.—Here's an attractive little feature that may be added to either the front or rear entrance of any Aladdin house. It is of the rustic type with exposed rafters and attractive brackets. It affords excellent protection during inclement weather. This is furnished complete with any Aladdin house, if ordered. See Price List.

Entrance Hood

WEIGHTS AND PULLEYS.—If desired to hang the sliding sash with weights and pulleys, we will provide them and also the necessary box window frames, at an added cost which will be quoted for any Aladdin house on request.

SCREEN DOORS, SCREEN SASH AND VERANDAH SCREENS

Our screens are all made from heavy stock; the wire netting is tightly stretched over the frame, securely fastened in place, and the edge covered with a neat half-round strip. In a house fitted with a set of Aladdin screens the problem of keeping out flies and mosquitoes is settled for a term of from ten to twenty years. These screens should not be confused with those cheap affairs which have to be renewed, if not every season, at least once in three years.

We will quote on application on a complete set of door, window or verandah screens for any house in our Catalogue. The price will in each case include all necessary hardware. For sliding sash windows, unless otherwise specified, we quote screens for lower sash only.

STORM SASH AND STORM DOORS

Storm doors are fitted with a light of glass. Storm sash are one and three-eighths inches thick and are of the best quality and workmanship. We supply these sash either with a lower-rail ventilator, or with patented hangers so that the sash can be opened outward. The latter type has the advantage that they are more easily put on from the inside of the house. In the case of a bungalow where all the windows are on the first floor, we would recommend the lower-rail ventilator.

Ask for price on storm doors and sash complete for the house in which you are interested.

VERANDAHs.—Verandahs are quoted separately in the price list for those homes from which they can be omitted without interfering with the construction or symmetry of the house itself. Inset verandahs and those shown on the illustrations, but not quoted separately on the price list, are included in the listed price of the home.

BASEMENT DOOR AND STAIRS.—Basement door and stairs are only included in the houses, at the price quoted when they are indicated in the floor plan.

BASEMENT WINDOWS.—Basement windows, complete with frame, glass and hardware will be included in shipment at prices quoted in list for this item. These sash have three lights, each 10 x 16 inches.

It is not necessary to forward the cellar frames before the house is shipped for by leaving the necessary wall openings, the frames can be set in after the foundation has been erected.

SLIDING DOORS, MIRROR DOORS AND FRENCH DOORS

An extra charge is made where a trimmed opening is replaced by a pair of sliding doors or a pair of glass doors. French Doors, usually with 10 lights of glass, will be supplied at an extra cost.

A panel door fitted one side with a four-foot plate mirror will be supplied in place of any door for an additional cost. See Price List for price of mirror.

LUMBER FOR FORMS.—It is not necessary to purchase additional lumber for building forms for concrete foundation walls. The lumber we supply for Aladdin Homes can readily be used for this purpose, and afterwards in the house itself.

FOUR-COLORED SHINGLES FOR ROOFS.—If four-colored shingles for the roof, such as illustrated on the Tuxedo, page 1, are desired, instead of standard XXX B.C. Cedar Shingles, which are regularly supplied, they will be furnished at an added cost which will be quoted upon request.

ASPHALT SLATE SHINGLES.—If Asphalt Slate Shingles, or other roofing is preferred, instead of XXX B.C. Cedar Shingles regularly supplied, it will be furnished at an additional cost, which will be quoted for any Aladdin House, upon request.

SHINGLE STAIN.—Shingle stain for the roof is not included in our standard specifications, but will be supplied in any desired quantity at an added cost.

HARDWOOD FLOORS.—Hardwood floors of a fine quality will be furnished for any of our homes, at an additional cost, which will be quoted upon request.

FOUNDATION POSTS.—We can furnish with your house shipment, foundation posts 8 feet long if ordered as an extra.

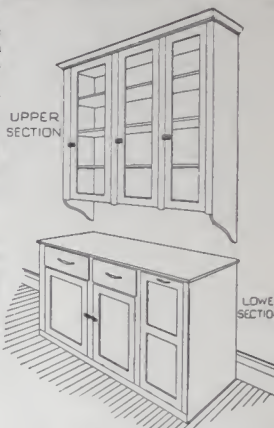

KITCHEN CABINETS.—A well arranged kitchen cabinet saves untold steps. It promotes neatness and order in that part of the house where it is most desired.

The housewife to-day looks upon a kitchen cabinet as a real necessity in the home.

The Cabinets illustrated here are shipped in the knock-down. The glass and hardware are packed and shipped separately.

The No. 3 Kitchen Cabinet is supplied as illustrated, in two separate sections. The upper section, 5 ft. in length, consists of a set of shelves each 10 inches wide for dishes, enclosed by glass doors. The lower section, also 5 ft. in length, 1 ft. 6 in. wide and 3 ft. high, consists of two cutlery drawers, two shelves for pots and pans enclosed by panelled doors, and a tilting flour bin. The two sections are quoted separately in the price list.

No. 2 Kitchen Cabinet is similar to No. 3 but narrower, it is also supplied in an upper and lower section. The upper section is 3 ft. 6 ins. wide with two glass doors. The lower section is 3 ft. 6 ins. wide and has two shelves enclosed by panelled doors. The two sections are quoted separately in the price list. No. 2 Cabinet does not include the flour bin.

No. 3 KITCHEN CABINET

MEDICINE CABINET.—This Sanitary Inset Medicine Cabinet is designed to be built into the partition of the bathroom or of a bedroom. The inside dimensions are: Width, 1 ft. 4 in.; height, 1 ft. 9 in.; depth, 4 in. It is fitted with three shelves and a plate mirror door. White pine, complete with mirror and hardware. See Price List.

CLOSET DOORS.—Closet Doors are not included unless indicated on the plans. If desired, they will be included, complete with hardware, at price quoted in list.

REAR ADDITIONS—DESIGNED FOR USE WITH ANY HOME

To make the designs illustrated more flexible, we are prepared to furnish an assortment of lean-to Additions, which are built on to the rear of our houses, increasing the ground floor space, so that other use can be made of the space shown on the Floor Plan. The exterior finish of these Additions will be furnished to harmonize with the appearance of your house without extra cost.

These Additions are furnished either with siding or shingles as desired, with shiplap underneath, on the studding.

ADDITION No. 1

COLONNADES

A Colonnade can be supplied in place of a trimmed opening between hall and living room or between living room and dining room in any house at an added cost. See price list.

COLONNADE No. 1

COLONNADE No. 2

EXTRA HEAVY WALL INSULATION FREE

Every Aladdin Home is specially INSULATED to keep IN the heat and keep OUT the cold. This is done by putting

ALADDIN

HEAVY INTER-WALL INSULATION

over all exterior walls, outside the sheathing lumber and between it and the siding or stucco, or whatever wall finish is used.

IT SEALS THE HOME—TIGHT.

NO AIR OR DRAFTS CAN PENETRATE IT.

HEAT AND COLD CANNOT GO THROUGH IT. It is THICK, HEAVY, WARM insulation.

We supply this extra warm overcoat for your new home!

ASK US TO SEND YOU A FREE SAMPLE OF THIS REMARKABLE, HEAVY INSULATING MATERIAL.

We want YOU to test it out—just try to tear it or break it. You will realize how tough and warm it is.

Wrap up a block of ice in this insulating material and leave it in a warm room. The heat cannot penetrate through, and it seems as if it will never melt.

WE SPARE NO MATERIALS, OR EFFORTS TO ENSURE THAT YOUR HOME WILL BE SUPER-WARM AND SUPERIOR IN CONSTRUCTION.

FOLDING IRONING BOARD FREE

No home is really complete without an Ironing Board which disappears into the kitchen wall when not in use.

So, EVERY Aladdin Home is equipped FREE with our FOLDING IRONING BOARD, as illustrated. This handsome fixture is inset, when building, in the most convenient position in the kitchen wall. The ironing board is hinged, and swings down, ready for use in an instant when the door of the fixture is opened. A space is provided at the bottom for the iron.

It is just another instance of the careful thoughtfulness for YOUR convenience and comfort supplied throughout by Aladdin.

COLONNADE WITH BOOKCASE AND CHINA CABINET

FINEST OF DOORS AND INTERIOR TRIM

We furnish the best grade of clear Fir doors.

The interior doors are two panel, as illustrated—the handsomest door made. The exterior doors are also Fir, of design as shown in the illustration of the home.

The interior trim is two piece,—a moulded casing and a heavy backband; the 8" baseboard is moulded to match, and all are run from high grade dressing stock.

The illustration shows this handsome interior trim and door, also the finishing hardware of distinctive modern pattern, supplied with all Aladdin Homes.

COLONNADE WITH BOOKCASE AND CHINA CABINET

The Colonnade, when built into a framed opening between living room and dining room or between living room and hall, is not only a very handsome fitting but is also very useful as the two cabinets are each fitted with glazed doors on both sides so that it is possible to use the living room side for books and the dining room side for china. The colonnade requires an opening at least seven feet wide and preferably eight feet wide. Price is quoted in the price list.

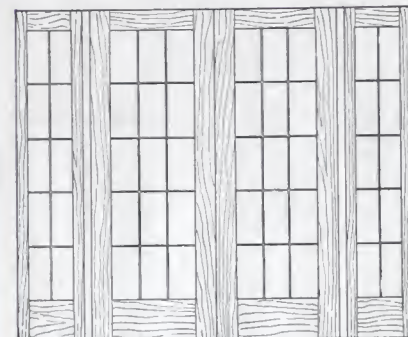

FRENCH DOORS

PAIR OF GLASS DOORS

A pair of French Doors with or without sidelights, add greatly to the comfort of the home when built into a framed opening.

They cut off all drafts and are in themselves an attractive feature. See Price List for prices

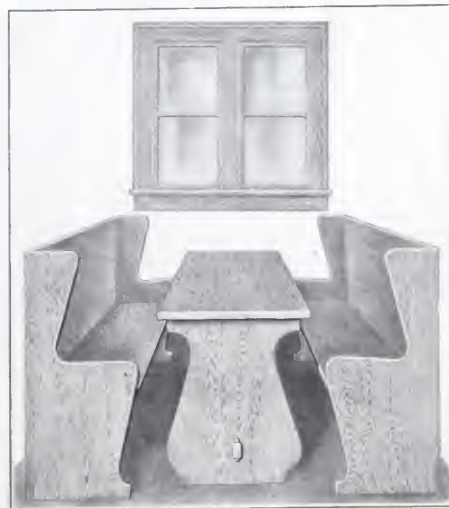

PAIR OF GLASS DOORS WITH SIDELIGHTS

BREAKFAST NOOK FURNITURE

The furniture consists of a table and two benches of attractive design. They can be used in a corner of the kitchen, on the verandah or on a sun porch. Makes a delightfully cozy spot for breakfast or tea or any of the daily tasks which can be done sitting down. The table is 1'-8" wide, 4'-0" long and 2'-6" high. The benches are 1'-4" wide, 4'-6" long and 3'-3" high to top of back.

They are furnished in dressing stock and shipped in knocked down. See price list.

BREAKFAST NOOK

Here's a Beautiful Home—It's Cost is Remarkably Low

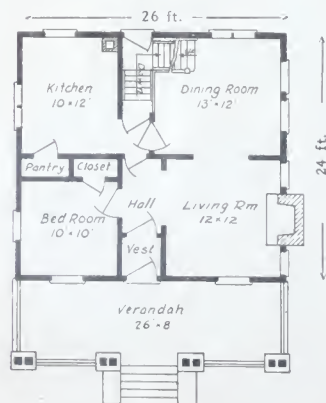

The Holmwood VI.

THE "HOLMWOOD VI" combines a number of very attractive features.

It is the most economical type of home that it is possible to build as it is only one storey in height, the space under the high-pitched roof being utilized for a very commodious second floor. It is the semi-bungalow type, an adaptation of the popular California bungalow to our Northern climate. Note how free the roof is from any thing in the nature of a snow trap.

The arrangement of the floor space is exceptionally good. The front door opens from a 26 ft. x 8 ft. verandah to a vestibule and hall from which the living room and dining room are entered through a wide framed opening. The entering guest has an immediate impression of spaciousness. To the left of the living room is a bedroom which may be used as a den or sewing-room. The main stair rises from the rear of the dining room with the basement stair below it permitting a rear-grade entrance giving

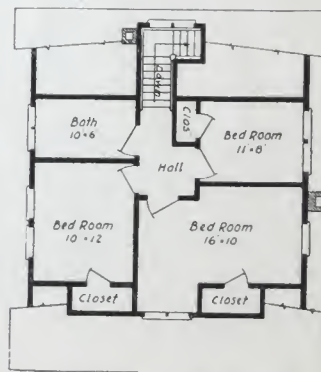

PLAN OF FIRST FLOOR

access to both cellar and kitchen. A pantry opens off the kitchen. Three quarters of the kitchen wall space is clear of doors and is available for the placing of stove, sink, table, and cabinet.

The second floor has three good bedrooms each with a closet, and a bathroom conveniently located at the head of the stair. The bathroom is directly over the kitchen so the plumbing charges will be moderate. The "Holmwood VI" is our designer's ideal of a beautiful home with an excellent floor plan at a minimum price.

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir Flooring at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there. For full detailed specifications see page 17.

PLAN OF SECOND FLOOR

We will REVERSE the Plans of any Aladdin Home, without charge.

So Many Have Chosen The GRANGE—You'll Surely Like It

The Grange

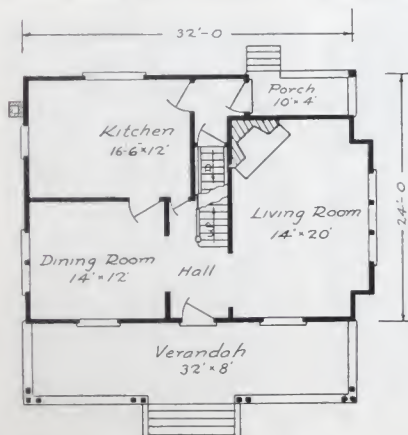

THIS design offers a happy solution of the problem of the man who wants a bungalow, but needs the roominess of a two-storey home. It is a design admired by everyone.

The interior arrangement makes it a very desirable town or farm home.

The three essential ground floor rooms, living room, dining room and kitchen, are all large and well lighted. If a

pantry is desired, it can readily be arranged at the left end of the kitchen. The front door is accessible from any room in the house without passing through any other room.

Four large bedrooms and bathroom, each with its own closet, and the balcony from the front bedroom, make an especially good second floor plan of large capacity. If a den or farm office is required, it can very easily be arranged by partitioning off the rear of the large living room.

PLAN OF FIRST FLOOR

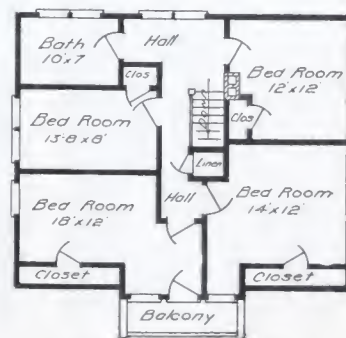

Generally, the foundation extends out underneath the bay window in the living room, which makes the four wooden brackets unnecessary.

If single light sash are preferred to the divided light sash for the upper half of windows, they can be furnished that way.

We furnish plans and directions free with every *Aladdin* home purchased. These are not for sale, and are furnished only when a complete house is purchased.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir Flooring, if desired, at an added cost, which will be quoted on request.

We will REVERSE the Plans of any Aladdin Home, without charge

PLAN OF SECOND FLOOR

An Interesting and Charming Home, Economical to Build—See Price List

The Yale

DIGNIFIED simplicity was the aim of our thoughtful designers in creating the Yale. When over twenty years in time and thought are devoted to one subject, surely you can know that the experience gained is of great value. For over twenty years the Aladdin Company has devoted all its energy towards perfecting ready cut homes. Perfection in a home means much.

It means, among other things, that the materials of which the home is constructed must be of the very highest quality. It means that the construction used in the building of the home must give strength, sturdiness, and the ability to withstand the wear of time. It means that the roof must be

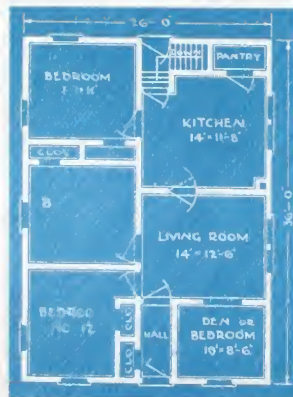

weather proof, and the paints used must be of the highest quality to give not only a well appearing home but perfect protection from the action of the weather in all seasons of the year. The completed home must be well insulated. It should be easy to heat in winter and easy to keep cool in summer. It means that the inside and outside doors must be so carefully located that they will be of convenient access in going from one room to another. These locations must also be studied to permit satisfactory arrangement of furniture and furnishings.

The location of windows is a problem in itself. Not only must the position of large pieces of furniture of common use in all homes be considered, but the number of windows to insure perfect ventilation cannot be lost sight of. Windows must be properly placed to present the best appearance within a room and also to give a balanced appearance from the exterior of the house. It has been the ambition of Aladdin to provide all these points of perfection in a home and at the same time sell that home at a lower price than it could be purchased for from any other source. If you prefer to stucco the outside of your home, we will furnish a quotation on that basis on request. Shingles for the exterior walls if preferred will be supplied at the same price as the siding shown in the picture.

The verandah, size 22 x 8 feet, is quoted separately (see Price List) so it may be ordered with the house, or added later, as desired. Verandah columns extending down to the verandah floor will be furnished, if preferred, without additional cost.

THE YALE—PLAN H

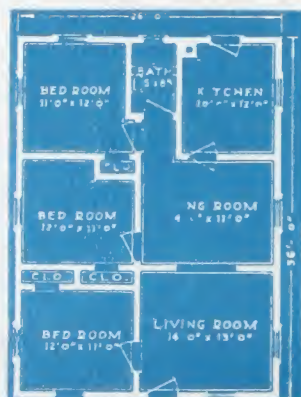

Plan H provides everything! Imagine a large living-room, with a den opening off it through a wide arch, a spacious kitchen with separate pantry, three big bedrooms each with closet, a vestibule and coat closet inside the front door, and a grade entrance and basement stairs at the rear! The den makes an excellent bedroom, if four bedrooms are desired.

THE YALE—PLAN H

THE YALE—PLAN C

Complete conveniences for a family of six are represented in the interior arrangements of the Yale—Plan C. The living room has unusual wall space, and opening through an arch to the dining room there is an impression of spaciousness which is the result of a depth of 24 feet. The bath is well detached, a desirable feature. Note the three large bedrooms, each with closet. A study of the window placements will reveal excellent light and airiness.

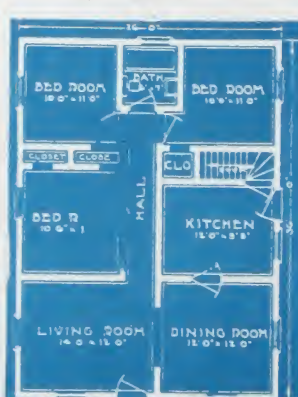

THE YALE—PLAN C

THE YALE—PLAN E

Here is a new type Yale which includes a central hall separating the rooms into two groups of three on each side. The bathroom is located at the end of this hall. A big living room, dining room, three bedrooms, kitchen, bath and closets with inside cellar entrance make a home complete to the last detail.

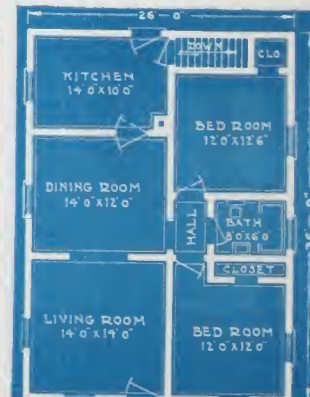

Read the many interesting details about Aladdin Homes on page 16, 17, 18 and 19.

THE YALE—PLAN E

THE YALE—PLAN J

The Yale, Plan J, proves that a modest home can be as artistic, as comfortable, and as attractive as the pretentious house. Within the compass of 26 x 36 feet there is included a generous sized living room and dining room, two bedrooms with fine closets, a large kitchen and good bathroom. The location and arrangement of the rooms are ideal.

THE YALE—PLAN J

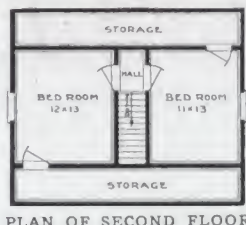

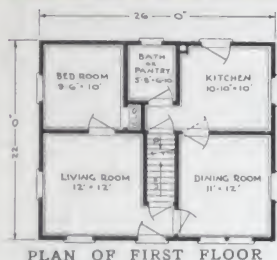

The Mayfair

THE MAYFAIR is a practical and economical home. One can hardly credit that so much space is available for your comfort. The lines are clean-cut and dignified. The placing of the verandah and windows is contrived to emphasize the substantial air.

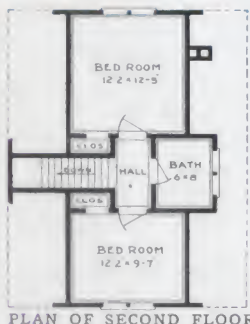

This beautiful creation combines every desirable feature—and at a very low cost. A glance at the floor plan will show that it is a model of convenience. The rooms are large and correctly grouped for your comfort. The Mayfair is quoted with the second floor unfinished. The materials to finish the second floor can be ordered with the house or, if desired, at a later date. The verandah, 14 feet x 8 feet, is an attractive feature.

Unless otherwise requested all Aladdin Homes are roofed with Clear Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

We will REVERSE the Plans of any Aladdin Home, without charge.

The Windermere

There isn't a small room in the "Windermere". Plenty of room everywhere and that's something seldom found in a home you can build at such a low cost as the "Windermere".

Have you noticed the shutters on the front windows, the rose-trellises, the clever treatment of the peak in the gable end—every little detail perfect and harmonized to ensure an ensemble which even the most critical architect or artist will freely praise.

Just study the floor plans of this remarkable home. A vestibule at the front door gives access to the front hall, with spacious living room to the left and dining room to the right.

Three bedrooms, all of large size and each with a clothes closet, a kitchen, almost as large as the living room, completes this home which for compact arrangement and roominess cannot be equalled.

Although shown with shingled exterior walls, this home may be stuccoed or finished with siding, if preferred.

Unless otherwise requested all Aladdin Homes are roofed with Clear Cedar shingles. If the "Four Color" shingles shown in the illustration are wanted, they will be furnished at a small added cost which will be quoted on request.

This Beautiful Bungalow Merits the Admiration of All

The Victoria XVII.

(STUCCO OR FRAME)

THE bungalow has come to stay. It is a type of architecture growing more popular with people of taste; in great favor on the Pacific Coast, its charms and advantages are rapidly bringing it in demand in the East. The house is shown stuccoed, but where soft effects are desired the shingled wall is best. The floors of piazza and front porch are of concrete or flag stones.

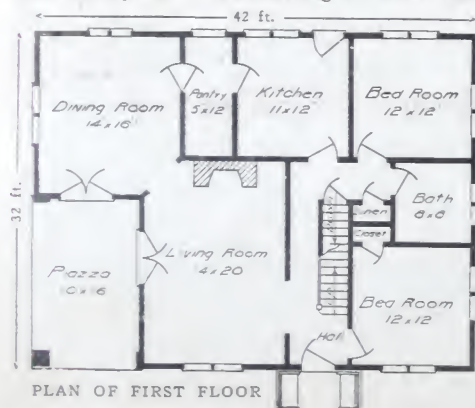

The beautiful lines, the hooded entrance with its Colonial benches and door, the divided light windows and French doors in the dining room and side of the living room, make this one of the best types of the bungalow designer's art. Note the living room entered through the framed archway on the left of the hall. To the right is the massive fireplace at the rear of the splendid 14 ft. x 20 ft. room with its mullioned front windows and French doors leading to the piazza and framed archway to the dining room.

The Victoria makes a beautiful home with a splendid floor arrangement. On entering the front door an immediate

impression of the size of the house is had from the fact that through the archway to the living room you can see out and through the glass doors to the Piazza and dining room, a distance of about forty feet to the rear of the dining room.

The dining room, lighted on three sides, is bright as day. A butler's pantry, kitchen, two bedrooms and bath, with closets and main and cellar stairs, divide the balance of the ground floor.

Three large well-lighted bedrooms with closets, on the second floor, complete the roll of this bungalow's chief features, making it the most popular one we have ever offered.

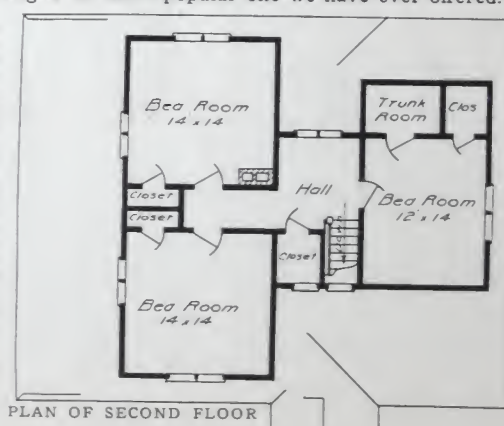

An additional bathroom is sometimes required on the second floor. We have an alternative second floor plan that provides for this bathroom upstairs at the rear of the second floor, in addition to the three bedrooms. If interested, send for this plan.

Unless otherwise instructed, standard sliding sash windows with the upper sash divided into small panes, will be supplied for the Victoria.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

FOR SMALLER VICTORIA PLANS SEE BOTTOM OF PAGE 25

We will REVERSE the Plans of any Aladdin Home, without charge.

Remarkable for its Low First Cost—See Price List

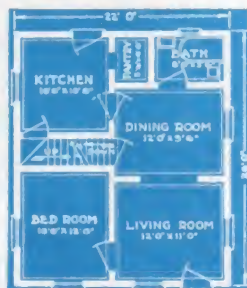

The Marigold

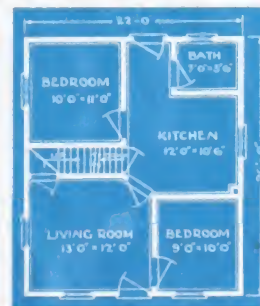

THE MARIGOLD offers a storey and a half home that can be built at the very lowest cost. The price quoted in Price List provides the home with the first floor finished in the same way as all our other houses are finished. The second floor is unfinished. The Marigold can be furnished in either of the first floor plans shown below. Regardless of which plan you select, it is possible for you to arrange for two extra bed rooms on the second floor. Our suggestion of a convenient and practical arrangement is shown opposite the first floor plans. When you purchase the home if you wish us to also include flooring and the other materials for finishing the second floor in accordance with our suggestion, we will be glad to do so at the additional price quoted in the Price List. The small sketch over the plan arrangement suggested for the second floor, will inform you of the ceiling height obtainable.

The verandah is 20 x 8 feet, spacious and attractive, setting off the house to advantage. It is quoted separately (see Price List) as it is sometimes desirable to build it on later. If preferred, verandah columns extending down to the verandah floor will be supplied without additional cost.

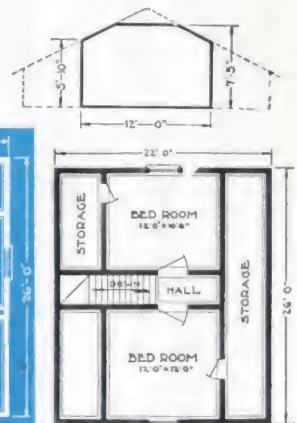

See Specifications on Page 17

FIRST FLOOR—PLAN A

FIRST FLOOR—PLAN C

Suggested Second Floor Plan

Victoria Thirty
PLAN OF FIRST FLOOR

THE VICTORIA THIRTY

THE *Victoria Thirty* is a variation of the *Victoria XVII*, reversed with the two bedrooms and bath on the first floor, eliminated to reduce the size and cost. The second floor has been rearranged to provide three bedrooms and bathroom.

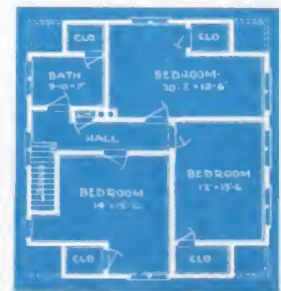

The ground floor plan is 30 x 32 ft. and has the same accommodation as the ground floor plan of the *Victoria XVII*, with the exception of the two bedrooms and bath. A sunroom 10 x 16 ft. opens from the living room through a framed arch. The living room, dining room, and kitchen remain the full size, and the general appearance of the *Victoria* is maintained. A pantry 5 x 12 ft. may be provided between the kitchen and the dining room, if desired.

The *Victoria Thirty* splendidly meets the requirements of those who select the *Victoria* but only require three bedrooms, particularly where it is necessary to build on a narrower lot. It is only 30 feet in width.

THE VICTORIA 109

Another variation of the *Victoria* is known as *The Victoria 109*. It is an exact reproduction of the *Victoria XVII*, but is reduced in size to 38 x 26 ft., with a proportionate reduction in the size of the rooms. Floor plans will be mailed on request. The beauty of the home is preserved in every detail.

We will REVERSE the Plans of any Aladdin Home, without charge.

SECOND FLOOR PLAN No. 1

SECOND FLOOR PLAN No. 2

BUILD IT YOURSELF

We usually advise our customers to have a carpenter, if possible, but we do say that any sensible man can build an Aladdin home if he follows our simple, plain instructions and detailed blue-prints of erection.

Every piece of material is cut to fit, with a few exceptions and these pieces are marked and numbered, so that you know just where every piece goes when you look at the pictures and carefully prepared instructions we supply.

Of course, if you build your own house, like so many other Aladdin customers have, you, too, will save the money you would have to pay a carpenter. "It's just common horse sense," wrote a customer, after he had moved into his new Aladdin. This man was so proud because he built his Aladdin himself—and he was not a carpenter either.

HOW ALADDIN SAVES YOU MONEY

Now let us tell you how we save you money.

The ready-cut plan avoids wasting lumber when building—saves about \$18.00 out of every \$100.00 worth of lumber ordinarily used in building your home.

Nine-tenths of all lumber coming out of the forests is in 8-foot, 10-foot, 12-foot, 14-foot and 16-foot lengths. When you want to use other lengths you have to pay more money for the same quantity and quality. Aladdin designs houses to use standard lengths. That's the economy of standard parts and that's the same kind of manufacturing economy that enables automobiles to be manufactured so cheaply. And that is what enables us to put in higher quality at lower prices.

Rapid, automatic machinery handles this lumber so swiftly, so accurately and so perfectly, that one man at a machine in our mills will cut as much as nearly a hundred carpenters can in the same length of time. You get the benefit of this saving.

The Aladdin system of cutting lumber in the mill saves about \$30.00 out of every \$100.00 worth of carpenter labor—as against the old system of measure, try, cut and fit on the job.

STURDY, HONEST LUMBER MAKES STURDY, HONEST HOMES

Early in its history, The Aladdin Company started to improve the quality of lumber that had been the custom to put into modest homes. It started to furnish beautiful lumber for the doors and interior wood work. And ever since it has devoted its efforts to improving its houses. It feels and believes that the modest home should have as good quality as the largest homes.

Paints furnished are standard high quality—the beautiful brushed brass hardware and locksets finish off the woodwork attractively. Pleasure and pride can't help but come to you when you know how good a home you have built, and, specially when you have secured all these good things and saved a lot of money too.

TWENTY YEARS OF EXPERIENCE

The houses shown in this book are the best we have planned in our twenty years' experience. We have learned from furnishing homes for thousands of families, enough to make a city of a quarter of a million population. Each size has many different floor plan arrangements to suit your family and your tastes. We have designed these houses and priced them so that you can get into a home at the lowest possible cost, or you can have added values like porches and kitchen cabinets. You can buy as much or as little as you like. We want to satisfy you exactly.

MASONRY, CHIMNEYS AND FIREPLACES

Chimneys can be located anywhere in the house you like, for we do not cut the materials for these openings. If you do not want the fireplace which may be shown in the photograph, you need not build it. Of course, any excavation work, and the foundation work must be done on the ground. Brick, stone and cement can be had in your locality as cheaply as we could furnish it. We furnish you a foundation plan to tell you how to proceed to build the kind of foundation you want.

THE ADAMS is a Canadian home of chaste simplicity. Straight architectural lines create a pleasing and substantial style of home, which fulfils the ideals of those who prefer conveniences rather than embellishments. Note the exposed rafters, shingled gable and belt at second storey. A spacious living room, square hall, vestibule and coat room, well proportioned dining room and model kitchen with grade cellar entrance, complete the first storey. The second storey has three excellent bedrooms, four closets and bath. We show an optional second storey which incorporates four bedrooms; either may be had at the same price. The verandah, size 16 ft. x 8 ft., sets off the house to advantage and is particularly desirable in the summer-time. It is quoted separately, as the Adams may be ordered and built without it, if preferred. See Price List. If preferred, verandah columns extending down to the verandah floor will be supplied without additional cost.

We will REVERSE the Plans of any Aladdin Home, without charge.

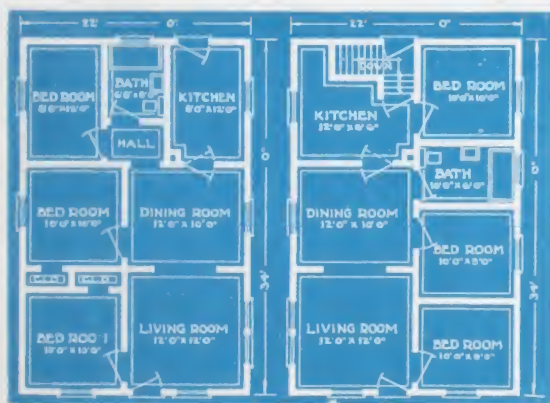

A Home of Dream-like Perfection—See Price List

The Bluebird

THE BLUEBIRD is a home of beautiful proportions, wonderfully convenient floor plan and well-balanced arrangement. To own it insures the fullest satisfaction and happiness—hence its name. It will fully measure up to your highest expectations, from the strength of its sturdy timbers to the charm and beauty of woodwork and finish. Three different floor plans are shown below.

Note particularly that the "Bluebird Twenty" is especially adapted for a narrow lot, as it is two feet less in width than No. 2 and No. 3, which are each 22 feet wide. It takes the same verandah, size 16 ft. x 8 ft., as the other Bluebird designs. The verandah is quoted separately. If desired verandah columns extending to the verandah floor will be supplied without additional cost.

BLUEBIRD No. 2

BLUEBIRD No. 3

CAN WE SEND MEN TO ERECT OUR HOUSES?

Yes, and good men, too; but it is generally a needless expense of time and railroad fare, when local talent can do it just as well.

When we cut, fit and finish materials by machinery, we save you two-thirds of what it would cost you to perform the same work by hand. One machine often does the work of fifty men.

The local carpenter should be given the work of erection if his quotation is right. If not, we will furnish an experienced Aladdin builder.

See Detailed Specifications on

BLUEBIRD TWENTY

ALTERING PLANS

Planning and building a home is an unusual event in the lives of most people, which probably accounts for the fact that so many, after building, regret that they did not plan to build differently in some respects. Our designs give the accumulated experience of many years in planning and building homes which leave no such regrets.

Many of our homes we have listed for ten years or more. They have been erected repeatedly and occupied for years. We have had of them, both in the course of erection and in process of occupation, a wealth of valuable criticism, with the result that many have been re-designed a dozen times, sometimes the change being no more than a slight re-arrangement of a bedroom or the kitchen, the altering of a window or moving a door a few inches. We have studied our designs not only in blue-print form, but as finished houses standing the final test of "being lived in," to the point that we question whether any change can be made in them which will not mean a net loss in convenience or general utility.

You will be well advised to hesitate before deciding to ask us to modify our standard designs to take care of little features that you believe would be an improvement on them. We would also like to emphasize the eminent desirability of taking one of our standard designs if it can be made to suit your needs; *no small part of Aladdin economy lies in standardization.* As we increase the proportion of irregular house designs passing through our engineering department and mills, the efficiency of our organization falls off. The making of new plans of necessity slows up our delivery, besides imposing an increased cost, which is properly chargeable against the special order. None of this must be taken to mean that we will not alter plans, but we are forced, by the pressure of work, to charge against the special order the actual drafting room costs of it plus or minus the cost of the materials added or taken out by the changes. You will readily see that if a standard design meets your needs fairly well you will receive greater value for your money than in one built to your special order.

And Here's a Larger Home at Low Cost—See Price List

The Edmonton

“WE want a square house—siding below, shingles above—and with a cottage roof. We want a living room, a dining room and a kitchen on the First Floor, and **FOUR** bedrooms and bath on the Second Floor.”

A surprising number of people outline their requirements of a Home in just these terms; you will note that we have emphasized the “four” bedrooms, as this is often an essential point. It is to meet this recognized need that we have catalogued the design Edmonton.

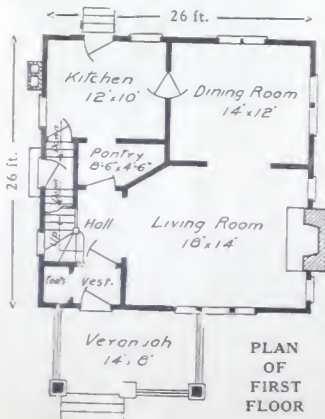

The Edmonton is something more than a home with a given capacity. In the Edmonton, we have striven to satisfy other needs besides those of utility; it is an entirely charming home of beauty and good taste suitable for the most select

of company; it is a home of noble proportions for any street of residences, or will serve with an equal fitness as a Farm Home.

At slight additional cost, the verandah can be run across the entire front of the house, if preferred. The verandah columns will be supplied, if desired, extending down to the verandah floor without additional cost.

Hardwood flooring will be supplied instead of the standard Edge Grain Fir flooring, if desired, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

THE “CANADIAN LUMBERMAN” SAYS AND EVERY THINKING PERSON AGREES

“Year after year the price of carpenter labor has been advancing, thus making the cost of lumber higher when in position. Framing material will eventually have to come to the building trimmed to length, and we fail to understand why this fact is not more generally realized. *The piece stuff of the future will be furnished to the building ready for position.* This thing of cutting and cutting with a handsaw at the building site until it fits is too costly.”

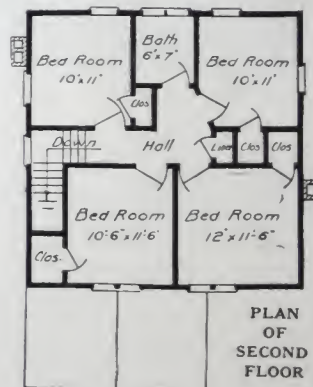

AN ALADDIN HOME

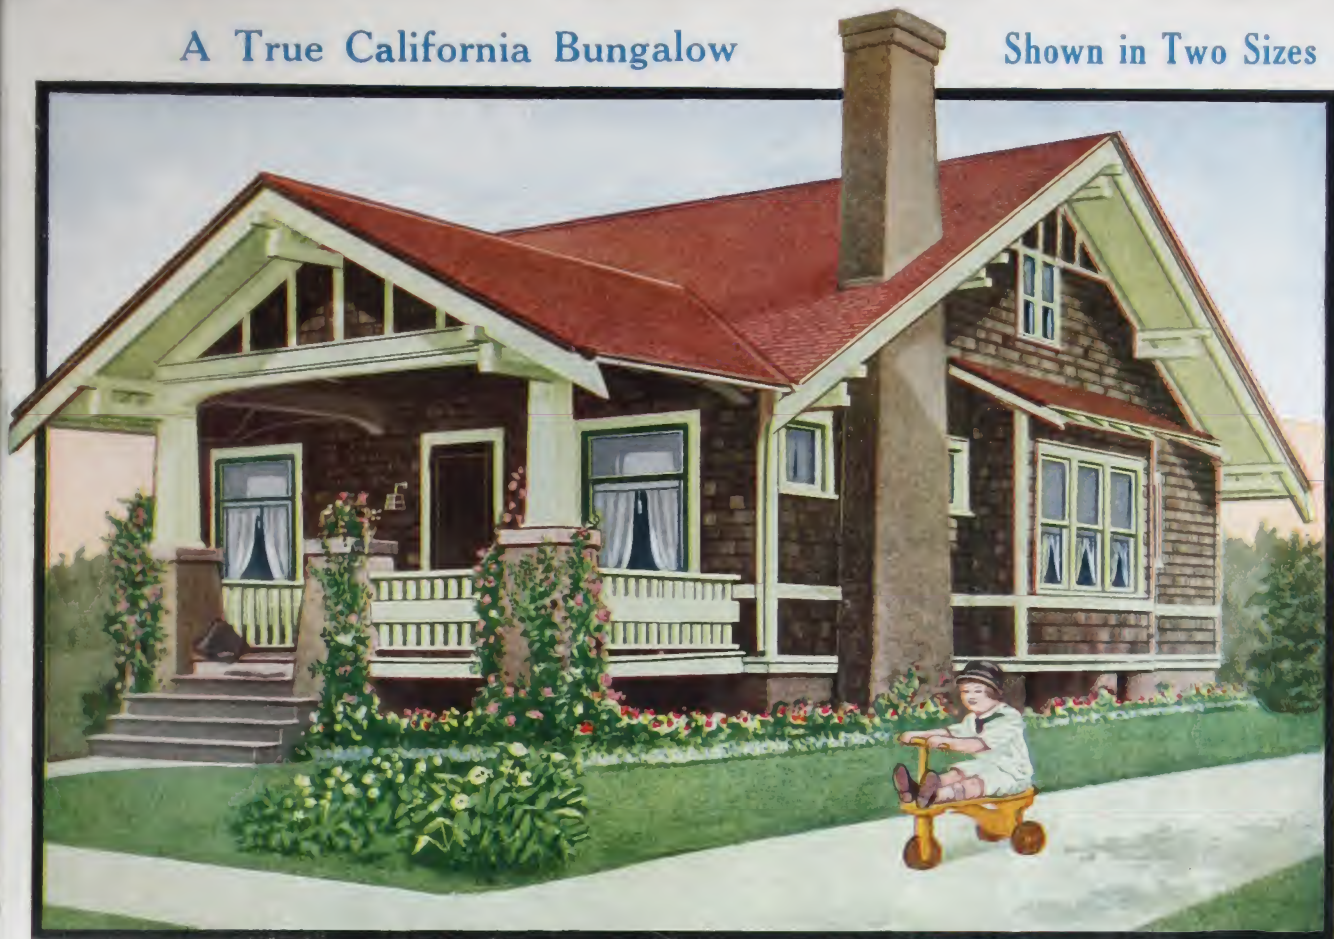

If your new Home is an Aladdin you are assured that it will have exceptionally attractive appearance, that it will be scientifically designed, substantially constructed and of first quality materials.

By eliminating architects' fees, wholesalers', jobbers' and dealers' profits, waste of material and costly hand labor, you will build at a big saving over the inefficient old-fashioned method.

Under the Aladdin Guarantee you are assured that your materials will be of first quality and that there will be no shortages. “Aladdin” signifies fair dealing, courteous treatment, prompt service and a guaranteed product.

We will REVERSE the Plans of any Aladdin Home, without charge.

The Pomona

THE POMONA is one of the finest examples of the California bungalow, and one of the few that can be built in a Northern climate, as it is compact for easy heating and has a roof with a good slope and no snow traps.

THE POMONA IS AVAILABLE IN TWO SIZES.

The Pomona "A" is 28 feet by 38 feet.

The Pomona "B" is 24 feet by 36 feet.

The lines of each are alike, and almost perfect.

The various decorative features such as brackets, belting course and half timbering give this bungalow added distinction.

In each, a generous sized living room, dining room and kitchen are provided and an open stairway, well-lighted by the dormer window at the top of it, leading to the second floor where two more bedrooms and a large linen closet are located.

While this home is illustrated in shingles for the outside walls, it can readily be supplied to be completed in siding, stucco or brick veneer, if preferred.

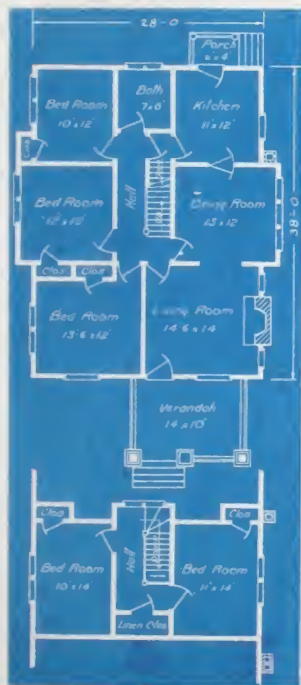

In the Pomona "A" there are eight large rooms, and bathroom, three of the five bedrooms being downstairs, and so arranged that the bathroom is readily reached from each through a hall which entirely separates them from the other rooms downstairs. Should the two bedrooms upstairs in the Pomona "A" not be required, a reduction will be made, for supplying this house with the upstairs unfinished.

In the Pomona "B" a square hall and coat closet are found as you enter. The pantry, opening off the kitchen, will make a fine Breakfast Nook if desired. There are three bedrooms, one of which is on the ground floor. The grade entrance to the basement and kitchen is a convenient feature. The bathroom is located on the second floor.

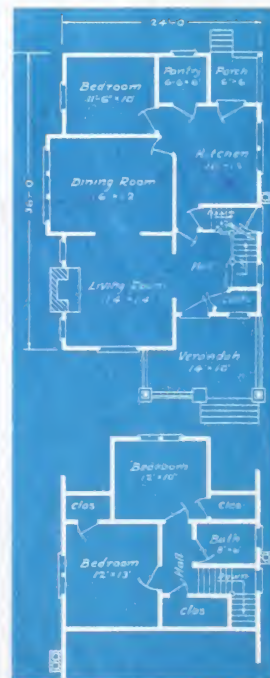

Hardwood flooring will be supplied, if desired, instead of our standard Edge Grain Fir flooring at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.

We will REVERSE the Plans of any Aladdin Home, without charge.

PLAN A

PLAN B

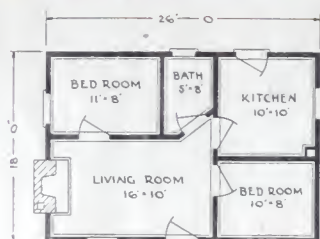

The Sunbeam

THIS is a prize-winner to gladden the hearts of those requiring a compact home of up-to-date appearance. It is surprising to find a house so complete and with so many conveniences, at so low a price.

Three floor plan arrangements are shown. Plans B and C contain stairs to basement, while Plan A is intended for those building without a cellar.

Plans A and C each contain two bedrooms, and extra large living room and spacious kitchen.

Each plan is priced alike. The hood over the front door is included.

SUNBEAM—PLAN A

Plan A is another variation of this remarkable design wherein two bedrooms are included with the big living room, kitchen and bath. It is a big seller and never fails to delight its owners.

SUNBEAM—PLAN B

This plan of the Sunbeam includes an inside cellar entrance—a complete little home having living room, dining room, bedroom, kitchen and bathroom.

SUNBEAM—PLAN C

Here is a very popular plan. The kitchen is extra large, 16 feet long, big living room, two bedrooms, closet and cellar stairs.

Garages Priced Remarkably Low

The four Aladdin Garages shown here cover the demand for 95% of all garages built, designed from our many years' experience in manufacturing garages. Aladdin garages are staunchly built of sound materials. The lumber is all cut to fit, so that a couple of days' time will erect and FINISH one. At prices quoted, you will easily understand why we are selling so many of them with our houses.

THE FORD, SIZE 8 x 14 ft. or 10 x 16 ft.

The Ford, illustrated at left, is made in two standard sizes, the 8 x 14 ft. size being designed for Ford cars. It is just large enough to admit a Ford touring car with the top either up or down. Any garage of smaller dimensions will not admit the Ford car. Size 8 x 14 ft. is complete with all material cut to fit, paints to match the colors of your house, hardware, locks, nails and roofing. Size 10 x 16 ft. is of the same construction. This will admit a car of 110 inch wheel base. See Price List.

THE STUDEBAKER, SIZE 12 x 20 ft.

The Studebaker, size 12 x 20 ft. will take the largest car on the market, with ample room at sides for working about the car, also storage space for supplies. It has swinging doors. It is of a splendid type and always looks well wherever it may be erected. Paint to match your house.

THE CADILLAC, SIZE 18 x 18 ft.

The Cadillac is an attractive two car garage with four swinging doors. It is size 18 x 18 ft., has plenty of room for two large cars. It is attractive in appearance and can be painted, if desired, to match the color scheme of house.

Complete with glass, hardware and paint.

THE FRANKLIN, SIZE 20 x 20 ft.

Distinctive and attractive, the Franklin, size 20 x 20 ft., two car garage will do credit to any surroundings. It is furnished with siding which can be painted to match color scheme of home. Four swinging doors are provided.

Specifications as follows: Sills, 4" x 4"; Studding 2" x 4"; 24" centers; Drop siding for side walls; Rafters, 2" x 4", 24" on centers; Exposed Eaves, Roof Sheathing, inch lumber laid tight. Best quality Cedar shingles for roof. Hardware, nails and paint for two coats on exterior. Materials ready-cut and complete blue prints showing every step of erection. All garages shown are furnished without floors, as practically all auto owners prefer to build floor of concrete or cinders.

"SATISFACTION OR YOUR MONEY BACK" IS OUR GUARANTEE TO YOU

Wesley College,

Canadian Aladdin Co., Ltd.,
218 Portage Ave.,
Winnipeg, Man.

Gentlemen:—

It is with pleasure that I write to tell you that the Aladdin Home which you supplied to me last summer and which I had built on Vernon Road, St. James, has given me the greatest satisfaction in every particular.

Mrs. Elliott and I are agreed that it is, without doubt, the warmest and most comfortable home we have ever had and you will be interested to know that throughout the past winter, which has been, at times, one of the most severe in Western Canada, we have always been warm and comfortable; in fact, it has been necessary at times to open several of the upstairs windows even on the coldest days.

I have had many favorable opinions passed by friends regarding my new home and no one has expressed any adverse criticism, so you may judge how entirely satisfactory it is.

It is gratifying to me to be able to write to you in this way on the completion of our transaction and after living in my new home several months. I wish to thank you for your helpful guidance and kindly co-operation.

In appreciation,

Yours very truly,

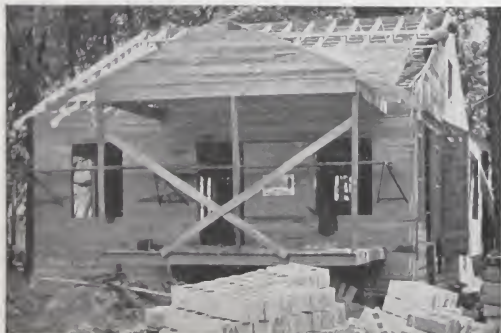

(Signed) James Elliott.

This is our guarantee to you—the soundest ever written. All materials are shipped subject to your inspection. If they are not exactly as specified in every particular notify us promptly when we will cheerfully refund your money. Read also "THE MATERIALS WE USE" on Page 16.

HOW AN ALADDIN HOME LOOKS IN COURSE OF CONSTRUCTION

Starting Construction on First Day.

Frame Work up on Third Day.

(THE POMONA)

An Aladdin home is exactly the same home that would be erected by a builder in the old-fashioned way.

It is not Sectional or Portable and cannot be taken apart except as you would tear apart any good house.

It is built from the same joists, studs, rafters, wall sheathing, etc., that a carpenter would use to build the house from the uncut material.

It is identical with the best frame, brick veneer or stucco construction.

The saving lies in the elimination of waste and the reduction of hand labor.

We are sometimes asked if the builder of an Aladdin house will not lose as much time hunting out his material and finding the right piece as he will save by the Read-Cut System. Of course this remark on the face of it is an admission that time is saved by the Aladdin System. However, any thought about time lost in hunting for pieces is immediately dispelled when you see the simple system of laying out materials that accompanies the instructions for every house, and when you understand that the length is marked on each piece of material, and that all pieces of the same length are interchangeable.

Progress of Work on Sixth Day.

Exterior Finished on Eighteenth Day.

Many Enthusiastic Owners Say This Home is Our Masterpiece

The Sunnyside

THE SUNNYSIDE! One of Aladdin's finest offerings. A home of brightness, happiness and cheer. Every line of this delightful home proclaims the character and refinement of its fortunate owner. The outside walls may be finished with shingles as illustrated or with siding or stucco if preferred.

The Sunnyside is available in two sizes. The Sunnyside "A" is 26 feet by 34 feet. The Sunnyside "B" is 22 feet by 30 feet. They are both designed on the same generous sweeping lines. In both, a framed opening invites you to a spacious dining room, the kitchen is arranged on modern step-saving lines, and the second floor contains three large, airy, well lighted and ventilated bedrooms. The bathroom, located as it is at the head of the stairway, is convenient to the whole house. Note the particularly large clothes closets and the linen closet!

The vestibule insures a warm hallway in the coldest weather. The coat closet opening from the vestibule will be appreciated. The living room, with its broad mullioned window is flooded with sunlight by day and the open fireplace conjures up visions of many happy evenings spent before a crackling grate-fire. Truly the Sunnyside is a modern home in every respect, replete with modern features.

In the Sunnyside "A" a well lighted and ventilated pantry is conveniently placed. This is just the right size for a Breakfast Nook, if preferred instead of a pantry. The Sun Room opening from the dining room has one wall which is all windows, and a door to the lawn.

In the Sunnyside "B" practically everything is provided in its same relative position as in the "A" plan. The extra large front bedroom and the three spacious rooms downstairs give the greatest comfort. This plan is of course priced lower than plan "A".

We will REVERSE the Plans of any Aladdin Home, without charge.

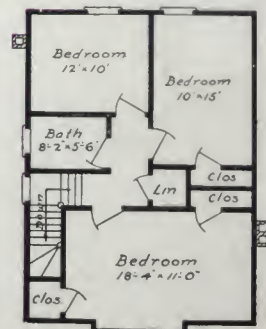

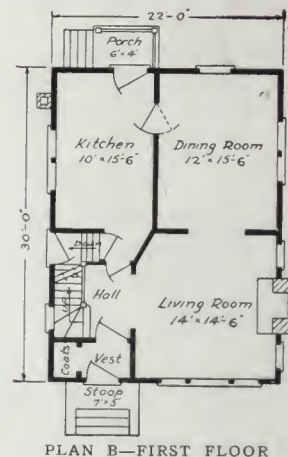

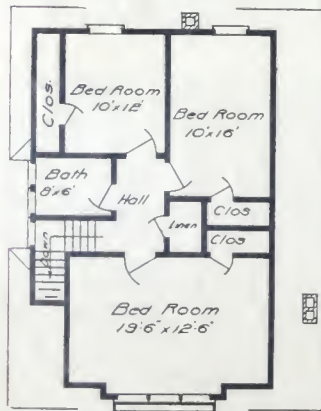

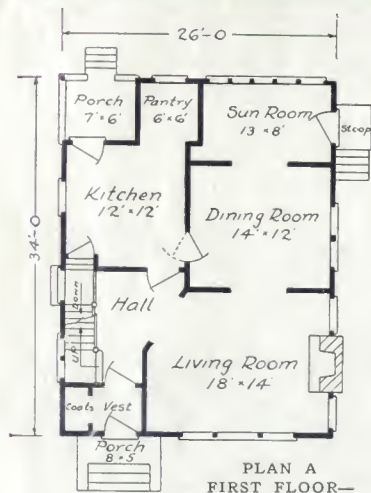

Hardwood flooring will be supplied, if desired, at an added cost, which will be quoted on request.

As British Columbia Fir is native to Western Canada, it is used for interior trim for all homes supplied there.
